ABSTRACTS SUBJECT INDEX TO VOLUME 113

ABDOMEN, Traumatic injuries to abdominal organs, 45; blunt trauma of, 357; civilian penetrating wounds of, 358; use of jejunum in surgery of upper, and comparison with esophagogastrostomy, 360; blunt trauma of, 459; closed trauma of, 460

Abnormalities and deformities, Etiology of congenital developmental anomalies; collective review, 1; new aspects on correction of unilateral cleft lip, 21; cleft lip and palate in Tasmania, 21; long-range evaluation of cleft palate repair, 21; absent umbilical artery, 65; diagnosis and therapy of congenital diaphragmatic defects and hiatus hernia in newborn and young infants, 72; early management of atresia of esophagus; collective review, 103; atypical congenital atresia of esophagus, 138; incidence of anomalous development following maternal rubella, 161; imperforate anus from a roentgenologic viewpoint, 166; abnormalities of rotation of bowel, 255; imperforate anus, 257; imperforate vagina in newborn, 270; developmental origin of spondylolisthesis, 276; corrections of deformities of lower part of face, 338; operative treatment of congenital deformities of chest, 349; duodenal obstruction of congenital origin, 359; congenital, of anus and rectum, 362; umbilical artery aplasia, 376; congenital dislocation of hip joint; results of treatment, 488; congenital uterine malformation, 547

Abortion, Chorionic gonadotropins in treatment of early spontaneous, 68; bacteremic shock in pyelonephritis and criminal, 68; etiology and therapy of habitual, 266; placental changes in early spontaneous, 371

Abscess, Of brain in children, 121; of brain in congenital heart disease, 228; changing concepts in therapy of lung, 537

Adrenal glands, And peptic ulcer, 46; effects of roentgen irradiation of adrenal cortical function in man, 79; therapy of Cushing's syndrome, 79; aldosteronic treatment of adrenalectomized patients, 80; histologic and histochemial aspects of, in course of prolonged artificial hypothermia, 95; response to adrenalectomy of a leukoerythroblastic process due to metastatic carcinoma of breast, 132; paroxysmal and persistent hypertension as result of pheochromocytoma, 175; diagnosis of pheochromocytoma, 274; Cushing's syndrome, 483; effect of nitrogen mustard on function of, 484; transperitoneal adrenalectomy, 484; problems in surgical treatment of pheochromocytoma, 484; accessory adrenocortical function after adrenalectomy in patients with breast cancer, 534

Amino acid, Effect of epsilon aminocaproic acid on bleeding after prostatectomy, 479

Amniotic fluid, Adrenaline, noradrenaline, and serotonin estimations in urine and, during delivery, 477

Analgesia, Spinal hemianalgesia; evaluation of method, its applicability, and influence on incidence of hypotension, 193; during labor; comparison of pentobarbital, meperidine, and morphine, 374; intrathecal use of xylocaine, 402

Anemia, Associated with dilated blind segments of small intestine after side-to-side anastomosis, 146; of pregnancy, 161; relief of, by repair of hiatus hernia, 457; pernicious, and gastric cancer in England and Wales, 462

Anesthesia, Distribution of radioactive barbiturates in different experimental situations, 97; use of toxiferine for production of surgical relaxation, 98; placental permeability and pharmacologic activity of thiopental sodium in obstetric, 98; effect of analgesia and, on fetus, 161; influence of head-jaw position upon upper airway patency, 192; problems related to prone position for surgical operations, 192; comparison of supraclavicular and axillary techniques for brachial plexus blocks, 193; axillary block of brachial plexus, 193; placental transmission of succinylcholine, 193; fluoromar, in obstetrics, 193; pulmonary evaluation and risk in patient preparation for surgery and, 291; expired carbon dioxide as continuous guide of pulmonary and circulatory systems during surgery and, 296; techniques of endobronchial, 401; further observations on xylocaine, established agent for, in comparison to other "caines," 402; external cephalic version under, 476; in newborns, infants, and young children, 478; bronchoscopy under general, 503; angiocardiography, 504; ataraxic drugs in preanesthetic medication, 504; effect of thiopental on peripheral venous tone, 504; muscle relaxants in, and experiences with new agent, c-toxiferin I, 504; with sodium 4-hydroxybutyrate in 220 neurosurgical cases, 505; problems caused by rauwolfia drugs during surgery and, 505; electrical, 505; efficiency of ventilation with various methods of control, 575

Aneurysms, Intrasellar, simulating hypophysial tumors, 27; cervical, and tumors, 119; of anterior communicating artery, 122; review of 7 years' experience with excision and graft replacement in 150 ruptured and unruptured abdominal aorta, 181; intravenous abdominal aortography in treatment of abdominal aortic, 195; role of air mediastinography in differential diagnosis of cardiovascular anomalies and surgical tumors, 196; large saccular, of vertebrobasilar system, 225; layering of contrast medium in intracranial, during angiography, 225; poststenotic, complicating coarctation of aorta, 241; of previously ligated patent ductus arteriosus, 243; abdominal aortic, 288; simplified treatment of large, sacciform aortic, with patch grafts, 288; bleeding, of basilar artery, 341; of splenic artery, 497; neurosurgical treatment of anterior communicating artery, 528; ruptured arteriosclerotic, of abdominal aorta, 579

Angiotensin II, Evaluation of pressor, cardiac, and renal hemodynamic properties of, 187; treatment of cardiovascular collapse with, 399

Ankle, Injuries to medial ligaments of, 86; widening of mortise of, 87; trauma, surgery, and circulation of talus, 285

Antibiotics, Incidence of reactions following oral administration of phenethicillin, 189; new penicillins, 500; effective period of preventive action of, in experimental incisions and dermal lesions, 500; effect of, in intestinal strangulation, 500; susceptibility of antibiotic-resistant staphylococci to heterologous, 501; protection of contaminated deep wounds against infection by intraperitoneal neomycin solutions, 571; influence of, on coagulation, 571

Anticoagulants, Antithrombotic properties of coumarin drugs, 290; in neurosurgery, 341; coagulation and thromboembolic complications among 234 burned patients, 400; coumarin therapy of patients with T tube drainage of common bile duct, 468

Antihistamines, Interstitial cystitis; explanation for beneficial effect of, 77

Anus, Imperforate, 257; pathogenesis and treatment of fistula-in-ano, 257; congenital abnormalities of rectum and, 362

Aorta, Extracorporeal bypass for operations on descending thoracic, 97; poststenotic dilatation of ascending; its occurrence and significance as roentgenologic sign of aortic stenosis, 100; simplified technique for detection of patent ductus arteriosus and other left-to-right shunts originating from, 137; treatment of coarctation of, with isthmotomy and plastic reconstruction of isthmus, 181; review of 7 years' experience with excision and graft replacement in 150 ruptured and unruptured aneurysms of abdominal, 181; intravenous abdominal aortography in treatment of aneurysms of abdominal, 195; complications in aortography and arteriography, 195; poststenotic aneurysms complicating coarctation of, 241; aneurysm of abdominal, 288; simplified treatment of large, sacciform aneurysms of, with patch grafts, 288; rupture of thoracic, due to nonpenetrating trauma, 353; percutaneous catheterization of, 353; coarctation of, 353; histologic observations of teflon grafts of, in normal dogs after 5 years, 397; re-evaluation of translumbar aortography, 403; coarctation of, in older patients, 538; some difficulties and early complications of operations on abdominal, below renal arteries, 567; ruptured arteriosclerotic aneurysms of abdominal, 579

Appendix, Surgical findings in case of "false" appendicitis, 52; eosinophilic allergic appendicitis, 148; reappraisal of effects of antimicrobial therapy on course of appendicitis in children, 148; acute appendicitis in children, 254; argentaffin cell tumors of, in children, 255; appendicitis and ligneous perityphlitis, 362; acute appendicitis with subsequent infertility, 477

Arteries, Surgical management of emboli of superior mesenteric, 89; replacement and reconstruction of, 89; healing complications with plastic implants of, 89; complications incident to cannulation in open heart surgery, 90; occlusions of central retinal and internal carotid, 113; retrograde renal arteriography in course of arterial hypertension, 170; etiologic treatment of arterial hypertension of presumed unilateral renal origin, 170; transmetatarsal amputations and surgery of, in diabetic patients, 178; chronic atherosclerotic occlusion of femoral, 182; surgical treatment of hypertension due to lesions of renal, 183; complications in aortography and arteriography, 195; auscultation of, 287; sudden occlusion of anterior tibial, 288; acute injuries of, due to blunt trauma, 288; some anomalies of circle of Willis, 297; roentgen diagnosis of fibromuscular hyperplasia of renal, 298; experimental study of hepatic periarterial neurectomy, 303; bleeding aneurysms of basilar, 341; new approaches to coronary arteriography, 353; aplasia of umbilical, 376; blind ductus arteriosus, 396; buckling of innominate, simulating aneurysm and tumor, 396; automatic electrocardiographically timed coronary angiography, 403; differential "nephropacification"; screening procedure for unilateral occlusion of renal, 404; insufficiency of vertebral, in acute and chronic spinal trauma, 445; use of an environmental temperature vasomotor test in evaluation of disease of peripheral, 496; aneurysm of splenic, 497; bridging defects of small, in dog with in situ preformed autologous connective tissue tubes, 497; replacement of small, by autologous veins, homologous, and teflon tubes in dogs, 497; combined teflon-autologous vein grafts for replacement of small, in dogs, 497; results following reconstructions of femoral and popliteal, 497; histologic study of lesions of large nerve trunks in spontaneous occlusions of, 509; some difficulties and early complications of operations on abdominal aorta below renal, 567; experience in management of injuries of, 567; spontaneous digital arteritis, 567; technique of intravenous carotid and vertebral arteriography, 577; mesenteric arteriography, 579

Arteries, carotid, Occlusion of internal, in young adults, 26; cervical aneurysms and tumors, 119; studies on flow in, 121; pressure changes in ophthalmic artery after occlusion of, 122; analysis of occlusive disease of, and stroke syndrome, 226; arteriosclerotic disease of, 287; vertebral arteriography by retrograde injection of right common, 395; false block of internal, during angiography, 395; kinking of internal, 497

Arteriosclerosis, Ten year status after sympathectomy for, 30; of carotid artery, 287; influence of, of heart on surgical risk, 292

Arthritis, Chronic rheumatoid polyarthritis and spondylarthritis associated with neurologic symptoms and signs occasionally simulating an intraspinal expansive process, 231; suppurative, of infancy, 386

Ascorbic acid, And blood coagulation, 290; economy of, in surgical patients, 292; and peripheral vascular system, 395

Asepsis, antisepsis, and antiseptics, Sterilization with ethylene oxide with special reference to use of synthetic materials, 501; efficiency of surgical masks in use in hospital wards, 501; "sterilization" of endoscopic instruments, 502

Asthma, Extirpation of glomus caroticum as surgical therapy for bronchial, 437

Bile duct, Cholangitis after choledochoduodenostomy, 57; technique of anastomosis of, 57; late results of choledochoduodenostomy, 57; strictures of common, and ampulla, 365; indications for choledochostomy in operations for cholelithiasis, 365; coumarin anticoagulant therapy of patients with T tube drainage of common, 468; epicholedochal venous plexus and its importance as means of identifying the common, during operations on extrahepatic biliary tract, 469; preoperative cholangiography, 581; operative cholangiography as part of surgical treatment of hydatid cysts of liver, 582

Biliary tract, Transcutaneous intrahepatic cholangiography in obstruction of, 56; cholecystography and cholegraphy in gallstone disease, 56; peroperative electronic radiomanometry of, 153; concerning certain lesions of sphincter of Oddi and their sequelae, 154; strictures of extrahepatic, 154; functional problems related to, 259; biloptin and solubiloptin, 299; morphologic and roentgenographic studies of biliary passages after section of pancreatic ducts of dog, 303; roentgenographic findings in cases of gastric biliary calculi, 363; examination of serum ferment activity in surgery of, 364; diagnosis of internal biliary fistula, 364; biliodigestive anastomoses, 468; intrahepatic biliary calculosis, 468; epicholedochal venous plexus and its importance as means of identifying the common duct during operations on extrahepatic, 469; technique and utility of secretion test, 469

Biopsy, Needle, of liver, 55; of liver in 197 patients with metastatic hepatic tumors, 151; untimely lymph node, 447; evolution of indications for impromptu, 509

Bladder, Interstitial cystitis; explanation for beneficial effect of antihistamine, 77; experimental study on regenerative properties of mucosa of, 77; diagnosis of obstruction of outlet of, 77; ureteral reimplantation and reconstruction of neck of, 78; treatment of cancer of, with radiocobalt and betatron, 78; surgical treatment of exstrophy of, and its results, 174; some aspects in classification and treatment of tumors

of, 174; local hypothermia of, during transurethral surgery, 174; substitution of urinary, with free gallbladder autograft, 204; primary localized amyloidosis of, 383; indications and results of partial cystectomy in carcinoma of, 383; cystometry during and cystography after transurethral resection of tumors of, 384; cystography in tumors of, 404; prevention of infections after cystoscopy; use of new antibacterial agent, 483; role of normal female urethra in sphincter mechanism of, 483; association of pneumoperitoneum of pelvis with pneumoexoperitoneum in vesical parietography, 507; injuries of, 549

Blood, Concerning cesarean section for suspected erythroblastosis of newborn, 67; experimental investigations of effect of polycarboxylic acid preparation on coagulation, 185; changes in coagulation of, due to perfusion for cardiac surgery, 186; use of glycerolized frozen, in vascular surgery and extracorporeal circulation, 188; clinicostatistical study on treatment and prophylaxis of hemolytic disease of newborn due to Rh factor, 268; studies of flow of coronary and peripheral, following hemorrhagic shock, transfusion, and l-norepinephine, 287; ascorbic acid and coagulation of, 290; antithrombotic properties of coumarin drugs, 290; serial microhematocrit determinations in evaluating replacement of, 293; evaluation of measurement techniques of volume of, 304; detection of fetal erythrocytes in smears of, 371; modern mythology of groups of, 398; measurement of volume of, with new apparatus, 402; thrombosis and thrombolysis; collective review, 513; erythrocyte survival in newborn infant, as measured by chromium 51 and its relation to postnatal serum bilirubin level, 551; reconstitution of frozen red cells, 568; influence of antibiotics on coagulation, 571

Blood, circulation, extracorporeal, Clinical evaluation of fresh and stored heparinized blood for use in, 96; experimental study of oxygen consumption during, with aid of homologous lung oxygenator, 97; extracorporeal bypass for operations on descending thoracic aorta, 97; use of glycerolized frozen blood in vascular surgery and, 188; methods for control of, 191; double-helical reservoir heart-lung machine, 192; bacterial contamination of oxygen used in cardiopulmonary bypass, 295; survival and physiologic studies with profound hypothermia, 0 to 8 degrees C., and pump oxygenator in dogs, 502; tolerance of circulatory arrest in deep hypothermia by extracorporeal cooling, 502; blood reactions during hypothermic perfusion, 503; coronary suction device, 506; reduction in flow in open heart surgery, 538; experimental and clinical study of use of acid-citrate-dextrose blood for, 572; use of low molecular weight dextran and serum expanders in, 573; surgical treatment of mitral insufficiency and combined mitral stenosis and insufficiency with use of heart-lung machine, 573; experiences with intracardiac procedures performed under hypothermia and with, 573; physical factors relating to gas embolism in blood, 574; silicone embolization during clinical and experimental heart surgery employing bubble oxygenator, 574; blood loss and replacement during bypass operations, 574; physiologic effects of intravascular antifoam A, 574; pulmonary complications after, 574; cerebral "fat" embolism after, 575; changes in blood after using, 575

Blood pressure, high, Etiology of hypertension in toxemia of pregnancy, 162; paroxysmal and persistent hypertension as result of pheochromocytoma, 175; surgical treatment of hypertension due to renal vascular lesions, 183; evaluation of radioactive renogram in hypertension, 199; renal disease with associated hypertension, 273; sympathetic ganglial system in permanent experimental hypertension, 509; value of sympathetic and suprarenal surgery in severe arterial hypertension, 530; some studies in experimental renal hypertension, 556

Blood transfusion, Corticotherapy in Rh-immunized pregnant women and value of exchange, in newborn, 70; exsanguinotransfusion with heparinized fresh blood, 163; irregular antibodies developing in donor plasma in reaction to, 398; use of unmodified blood given by direct, 568

Blood vessels, Artifacts in cerebral angiography, 25; combination of saccular aneurysm of pericallosal artery with anomalies of circle of Willis in carotid angiogram, 25; intermittent vertebral artery compression; new syndrome, 25; arteriovenous fistulas of splenic pedicle, 58; arterial changes in experimental fractures of rabbit's tibia treated with intramedullary nailing, 86; indications and techniques for renovascular surgery on hypertensive patients, 90; vertebral angiography, 121; clinical study of angiographic anatomy, 181; centrally located venous and arterial ectasias associated with arteriovenous aneurysms of long duration, 182; surgical approach to great cervicomediastinal vessels, 182; angiographic observations on arteriosclerotic venopathy of inferior vena cava, 183; use of glycerolized frozen blood in surgery of, and extracorporeal circulation, 188; experiences with 710 angiograms of heart and of great vessels, 196; role of air mediastinography in differential diagnosis of cardiovascular anomalies and surgical tumors, 196; diagnosis and surgical treatment of pulmonary arteriovenous fistula, 236; vascular complications from disc operations, 278; experimental studies in surgery of small, 287; operative treatment of peripheral and mesenteric emboli, 289; cutaneous necrosis as a result of perfusion with noradrenaline, 291; evaluation of cardiovascular contrast media, 298; clinical evaluation of intravenous abdominal aortography and peripheral arteriography, 298; incidence and prognostic significance of invasion of, in bronchial carcinoma, 351; diagnosis and differential diagnosis of vascular insufficiency of upper extremities, 395; ascorbic acid and peripheral vascular system, 395; present status of aortoiliac endarterectomy for obliterative atherosclerosis, 396; autogenous grafts of, 397; replacement of, in grossly contaminated wounds, 397; venoangiography, 404; investigation of vascularization of human palpebra, 434; clinical importance of variants of origin of innominate artery in man during operations on neck and anterior mediastinum, 437; major vascular complications of lumbar disc surgery, 444; examination and surgical treatment of children with bronchiectasis and major vascular anomalies, 451; surgical therapy of extracardiac anomalous pulmonary drainage, 454; transfer of coronary ostia by "triangulation" in transposition of great vessels and anomalous coronary arteries, 455; angiocardiography, 504; tumors arising from, in hands and feet, 532; porosity; primary determinant of ultimate fate of synthetic grafts in, 568; roto-drill, new instrument for thromboendarterectomy, 576; low viscosity contrast media for cardiovascular visualization, 578; experience with major arterial visualization employing right heart or superior vena cava injection, 578

Bone, Practical application of method of quantitative determination of calcium content of healthy and diseased, 81; metastases from bronchogenic carcinoma in, 81; metastases in, from carcinoma of breast, 81; diagnosis of fibrous dysplasia in surgical practice, 81; plasmacytoma, 82; osteogenesis imperfecta tarda, 82; giant cell tumors of, (osteoclastoma), 82; sodium in, in surgical operations and

disease, 101; generalized interstitial calcinosis, 177; comparison of autologous and homologous grafts of, for cranioplasty, 221; plastic repair of defects in skull with deep-frozen, homogenous, cranial, 227; housing problem of osteoblast, 275; blood supply and survival of autogenous grafts of spongiosa, 275; use of grafting of, in reparative orthopedic surgery, 275; homoplastic frozen milled grafts, 275; radiographically demonstrable thickening of, in spinous processes of lumbar spine, 277; histologic and dosimetric considerations of production of tumors of, with radioactive phosphorus, 285; clinical and morphologic observations on 19 cases of plasmacytoma, 286; mineral and protein framework of normal and pathologic human, as seen by electronic microscope, 385; internal fixation of fractures using homoplastic and heteroplastic, 386; transplants of osteogenic tissue, 386; osteoporosis in plasmacytoma, 387; radiotherapy for osteogenic sarcoma, 387; sarcoma of, complicating Paget's disease, 387; refractures, pseudarthroses and cysts of navicular, 390; characteristic lesions of, in postirradiated carcinoma of cervix, 405; skeletal shape and muscle power, 485; acute hematogenous osteomyelitis with special reference to osteitis of neck of femur, 490; Hodgkin's disease in, 562; mortality from primary tumors of, in England and Wales, 562; radioactive calcium, Ca^{47}, tracer studies in patients with lesions of, 583

Bone marrow, Current concepts of storage of, 511; biologic basis and clinical application of transplantation of, 512

Brain, Safe and simple method for percutaneous vertebral angiography, 25; intermittent vertebral artery compression, 25; early recognition and surgical treatment of midbrain tumors, 26; internal carotid artery occlusion in young adults, 26; intrasellar aneurysms simulating hypophysial tumors, 27; radiologic changes and clinical incidence of endocrine effects in sellar and parasellar tumors, 27; effect of focal lesions of, upon auditory and visual recent memory in man, 27; vertebral angiography, 121; diagnosis of tuberculomas of, 123; intracranial epidermoids, 124; apoplexy associated with tumors of, 124; in vitro-in vivo screening of drugs for use in regional chemotherapy of cancer of, 124; fibrinolysin determinations in differential diagnosis of tumors of, 226; new sign in pneumoencephalographic study of cerebellopontine angle tumors, 226; prognosis of medulloblastoma in children, 227; diagnosis of cerebellar hemangioblastomas, 227; abscess of, in congenital heart disease, 228; value of radiation therapy in management of intracranial metastases, 229; encephalopathy after surgical portacaval anastomosis, 258; cerebral metabolic studies on human during total cerebral arterial occlusion and hypothermia, 295; pneumoencephalographic appearance of cisterns in posterior fossa tumors, 341; technique of controlled hypothermia in operations on, 401; delayed radionecrosis of, following therapeutic x-radiation of pituitary, 443; angiography of temporal arachnoid cysts, 527; cerebral angiography in diagnosis of suprasellar tumors, 527; roentgenologic features of neurofibromas involving gasserian ganglion, 527; indications and technique of iodoventriculography, 527; intracerebral hematoma of traumatic origin, 528; neurosurgical treatment of anterior communicating artery aneurysm, 528; damage to, in newborn due to birth trauma, 551

Breast, Observations on use of nonsteroidal estrogen antagonist, 33; cystic disease and carcinoma of, 33; adenomas of; relationship of adenofibromas to pregnancy and lactation, 33; tumor size, duration of symptoms, and prognosis in carcinoma of, 33; factors influencing response to hypophysectomy for advanced cancer of, 34; hereditary gynecomastia, 34; bone metastases from carcinoma of, 81; infarcts of, associated with pregnancy and presenting as tumors, 131; estrogen excretion of patients with cancer of, 131; cancer of, and thyroid disease, 131; survival of patients with "recurrent" or inoperable carcinoma of, with special consideration of effect of hormonal treatment, 131; thiotepa in carcinoma of, treated by bilateral adrenalectomy and oophorectomy, 132; response to adrenalectomy of leukoerythroblastic process due to metastatic carcinoma of, 132; suppression of postpartum lactation and prevention of engorgement of, in nonnursing mothers, 165; transsternal internal mammary phlebography for demonstrating intrathoracic adenopathy in cancer of, 195; palliation of osseous metastases from carcinoma of, with radioactive phosphorus alone and in combination with adrenalectomy, 200; thyroid function in presence of cancer of, 233; cancer of, in women, 233; transsternal phlebography of internal mammary system for delineation of intrathoracic extension of carcinoma of, 234; reliability of roentgenologic diagnosis of cancer of, 347; detection and disposal of cancer of, in pregnancy, 347; simplified treatment of cancer of, 347; blood corticosteroid levels in mastopathy and cancer of, after ACTH administration, 348; treatment of cancer of, by radical mastectomy, postoperative roentgen therapy, and intravenous radiophosphorus, 405; treatment of locally advanced carcinoma of, with roentgen therapy and simple mastectomy, 405; intravascular irradiation of internal mammary lymph nodes in cancer of, 406; hypophysectomy and radioactive gold implants in treatment of metastatic carcinoma of, 443; empirical approach to mammoplasties, 449; carcinoma of, 449; clinicopathologic analysis of surgical curability of cancer of, 450; gastroduodenal metastases from carcinoma of, 450; treatment of cancer of, by radical mastectomy, postoperative roentgen therapy, and intravenous radiophosphorus, 508; improved method in diagnostic roentgenography of, 533; accessory adrenocortical function after adrenalectomy in patients with cancer of, 534; independent primary malignant neoplasms following mastectomy for carcinoma of, 534

Bronchus, Observations on cytology of tracheobronchial secretions collected by new technique, 134; surgical incidence of broncholithiasis, 135; result of surgical intervention in bilateral dilatations of, 135; in pulmonary sarcoidosis, 236; percutaneous cricothyroid membrane bronchography, 239; nonbenign nature of carcinoids and cylindromas of, 240; study of peristalsis of, 350; bronchoscopy under general anesthesia, 503; 2 cases of secondary aspergilloma of, 535; traumatic bronchobiliary fistulas, 536; roentgenotherapy for tumors of, 583

Burns, Deep, of scalp with osseous involvement, 31; treatment of shock in child with, 93; advances in immediate, late, and long term management of, 93; evaluation of therapy in, by morbidity studies, 293; treatment of severe electric injuries, 294; early differentiation between necrotic and viable tissue in, 399; series of 77 full thickness, of skin with necrectomy immediately after electrolyte stabilization, 400; coagulation and thromboembolic complications among 234 patients with, 400; mucormycosis in patients with severe, 500; treatment of sequelae of, of major joints, 533; craniofacial, 570

CALCIUM, Practical method of quantitative determination of content of, in healthy and diseased bone, 81

Cancer, Differences between childhood and adult thyroid, 23; explanation for varying incidence of, in surgically removed nodular thyroid glands, 23; cylindroma (adenoid-cystic carcinoma) of larynx and trachea, 24; tumor size, duration of symptoms, and prognosis in breast, 33; experience with 3,000 cases of esophageal and cardial, 41; clinical aspects of esophageal, 42; esophageal, 42; gastric, 49; perforated gastric, 49; primary, in postgastrectomy stomach pouch, 50; changing concepts in treatment of colonic and rectal, 54; studies on inheritance of human cervical, 60; relationship of sexual activity to cervical, 60; subdivision of intraepithelial, 60; treatment of collum, at Keil University Women's Clinic from 1938 to 1954, 60; combined treatment of cervical, with full irradiation therapy followed by radical pelvic operation, 61; critical points of failure in therapy of cervical, 61; of ovary, 62; of vulva, 63; prostatic fraction of acid phosphatase versus total acid phosphatase; reliability in diagnosis and treatment of prostatic, 73; treatment of bladder, with radiocobalt and betatron, 78; how to manage pain in malignant disease, 102; sociocultural factors in, in Hawaii, 102; estrogen excretion of patients with breast, 131; of breast and thyroid disease, 131; survival of patients with "recurrent" or inoperable breast, with special consideration of effect of hormonal treatment, 131; thiotepa in breast, treated by bilateral adrenalectomy and oophorectomy, 132; occult invasive, in polypoid adenomas of colon and rectum, 150; unsuspected gallbladder, in acute and chronic cholecystitis, 154; incidence of pelvic malignancies following irradiation for benign gynecologic conditions, 157; results in management of preclinical cervical, 158; survival in invasive cervical, 5 to 10 years after radiation therapy, 159; of vulva, 160; intraepithelial and infiltrative carcinoma of vulva; Bowen's type, 160; of penis, 167; treatment of intractable pain with morphine and tetrahydromaninacrine, 187; intracavitary radiogold therapy, 199; progestational agents in treatment of endometrial, 202; thyroid function in presence of breast, 233; of breast in women, 233; nonbenign nature of bronchial carcinoids and cylindromas, 240; peripheral bronchial, 240; multiple primary bronchogenic, 241; of stomach, 248; pathology and prognosis of gastric, 248; malignant lesions of stomach, in Hawaii; experience with 350 patients, 249; implantation from bowel lumen in, of large intestine, 256; practical implications of multiple tumors of colon and rectum, 257; in situ of cervix, 262; in situ, beginning, and clinical cervical, 262; further experience with radiogold as adjunct to radium therapy in treatment of pelvic lymph nodes in cervical, 262; of body of uterus at Chelsea Hospital for Women, 1943-1953, 264; treatment of malignant trophoblastic growth in women, with special reference to amethopterin, 264; endometrial, 264; precursors of corpus, 265; infiltrative squamous cell, epidermoid, vulval, 265; unsuspected, in surgical specimens of prostate, 271; new conceptions in treatment of primary kidney, in adult, 273; radiosensitivity testing procedures in cervical, 300; host factors affecting radiation response in cervical, 301; combined high pressure oxygen and radiation therapy in treatment of human, 301; new approaches to treatment of, 305; multiple oral, 339; of thyroid, 339; chronic ulceration and, 343; detection and disposal of breast, in pregnancy, 347; simplified treatment of breast, 347; blood corticosteroid levels in mastopathy and breast, after ACTH administration, 348; incidence and prognostic significance of blood vessel invasion in bronchial, 351; lung, among Indians of southwestern United States, 351; of lung, 351; results of 119 operations for bronchopulmonary, 352; primary, of gallbladder, 364; gallbladder, 364; management of early, 368; recent cure results of cervical, 368; management of recurrent, of cervix following simple total hysterectomy, 368; characteristic bone lesions in postirradiated cervical, 405; treatment of breast, by radical mastectomy, postoperative roentgen therapy, and intravenous radiophosphorus, 405; treatment of locally advanced breast, with roentgen therapy and simple mastectomy, 405; intravascular irradiation of internal mammary lymph nodes in breast, 406; role of combined surgery and radiation in treatment of reproductive system, 406; role of electron therapy in treatment of patients with, 407; epithelioma of tongue, 435; place of radiotherapy in treatment of laryngeal, 436; age and thyroid, 438; malignant thyroid disease, 438; of thyroid, 438; in nontoxic nodular goiter, 439; results of x-ray treatment in undifferentiated thyroid, 439; water intoxication after hypophysectomy, 443; untimely lymph node biopsy, 447; psoriasis, 448; mammary, 449; clinicopathologic analysis of surgical curability of breast, 450; lymphatic propagation and reticuloendothelial reaction in 92 cases of lung, 451; of esophagus, 457; pernicious anemia and gastric, in England and Wales, 462; gastric, following gastroenterostomy and partial gastrectomy, 462; of large bowel in young adult, 465; factors affecting prognosis of cervical, in pregnancy, 471; prognosis in cervical, as determined by vaginal smear, 472; rectal and bladder injuries in relation to radiation dosage in cervical, 472; vulvar, 473; radioactive colloidal yttrium silicate in treatment of malignant effusions, 511; treatment of, of tongue and floor of mouth, 525; incidence and etiology of thyroid, 525; accessory adrenocortical function after adrenalectomy in patients with breast, 534; independent primary malignant neoplasms following mastectomy for breast, 534; theoretical factors that may influence long term survival in lung, 537; results of treatment of lung, 537; results of treatment of genital, 548; study of acid phosphatase of blood during treatment of prostatic, with sodium salt of hexestrol diphosphate via rectal administration, 553; therapy of prostatic, by means of rectal administration of hexestrol diphosphate, 553; Jewish penile, 554

Cancer, chemotherapy, Intra-aortic nitrogen mustard for palliation of advanced pelvic cancer, 101; clinical evaluation of, with 5-fluorouracil, 101; in vitro-in vivo screening of drugs for use in regional brain, 124; influence of drugs on host-tumor relationships in cancerology and their therapeutic implications, 202; regional, via intra-arterial perfusion, 203; effects of combined roentgen irradiation and, on transplanted tumors in mice, 204; advanced malignant neoplasms treated with nitrogen mustard and hormones, 204; simultaneous irradiation and regional intra-arterial perfusion with nitrogen mustard for extensive cancers of head and neck, 305; carcinoma of cervix treated with continuous intra-arterial methotrexate and intermittent intramuscular leucovorin, 306; intra-arterial infusions of pelvic tumors with amethopterin, 369; role of combination radiation and, 406; initial clinical studies with 5-iodo-2-deoxyuridine, 409; prolonged intra-arterial, for inoperable cancer, 409; therapeutic results with chlorambucil in systemic lymphatic diseases, reticulosis, and related diseases, 510; perfusion and infusion techniques in, 511

Cancer, diagnosis, Early diagnosis and prognosis of bronchial, 35; differential diagnosis between inflammatory changes and, in lung cortex by bronchography, 36; cytologic diagnosis of lung, 134; cytotopo-

graphic and histotopographic investigation of cervical canal in preinvasive cancer, 158; demonstration of tumor cells in blood in cancer of female genitalia, 158; vaginal smear in office practice—swab technique, 158; diagnosis of malignancy of kidney, renal pelvis, and ureter, 171; transsternal phlebography of internal mammary system for delineation of intrathoracic extension of breast, 234; cytologic examinations of sputum using Papanicolaou's technique, 239; efficiency of preoperative endoscopy in diagnosis of primary bronchogenic carcinoma in 304 patients, 240; pneumomediastinography in lung, 240; contraindications to surgery for bronchogenic carcinoma in aged; usefulness of scalene lymph node biopsy, 241; diagnosis of carcinoma of large bowel by exfoliative cytology, 256; lactic dehydrogenase activity in, 304; reliability of roentgenologic diagnosis of breast, 347; colpomicroscope, auflichtmikroskop, in diagnosis of benign and premalignant lesions of cervix uteri, 367; silicone flotation; more accurate method for isolation of exfoliated malignant cells of carcinoma in urinary tract, 381; estimation of chorionic gonadotropin in placental tissue and urine as means of early detection of invasive mole and chorion, 471; diagnostic cytology of endometrial cells, with aid of Papanicolaou's method and Hotchkiss-McManus reaction, 472; quantitative method for studying tumor cells in blood, 510; tetracycline fluorescence in diagnosis of gastric carcinoma, 543; separation of neoplastic cells from urine containing blood or pus cells by means of differential centrifugation, 557; roentgenologic features of, in chronic ulcerative colitis, 580; pancreatic, and its early roentgenologic recognition, 582; variations of serum levels of enzymes aldolase and lactic dehydrogenase in patients with malignant neoplasms, 586

Cancer, metastases, Incidence of cervical lymph node metastases from epidermoid laryngeal carcinoma and their relationship to certain characteristics of primary tumor, 24; bone metastases from breast cancer, 81; metastases from bronchogenic carcinoma in bones of hand, 81; metastasis of malignant tumors of jaw, 117; response to adrenalectomy of a leukoerythroblastic process due to metastatic carcinoma of breast, 132; needle biopsy of liver in 197 patients with metastatic hepatic tumors, 151; palliation of osseous metastases from breast carcinoma with radioactive phosphorus alone and in combination with adrenalectomy, 200; value of radiation therapy in management of intracranial metastases, 229; simultaneous splenoportography and cavography for study of adenopathy and deep metastases, 259; report of symptomatic endocardial metastasis in carcinoma of cervix, 262; in cervical vertebrae, 276; distant metastasis of oral carcinoma, 339; hypophysectomy and radioactive gold implants in treatment of metastatic carcinoma of breast, 443; gastroduodenal metastases from carcinoma of breast, 450; metastasizing bronchial adenoma with atypical carcinoid syndrome, 536

Cancer, research, Influence of drugs on host-tumor relationships in cancerology and their therapeutic implications, 202; tumor autograft responses in patients with glioblastoma multiforme, 304; studies with mouse pituitary tumors, 304; effect of various synthetic estrogens on respiration of ascites tumor cells in vitro, 409; induction of intestinal, mammary, and ovarian tumors in hamsters with oral administration of 20-methylcholanthrene, 410; animal cancer, primary tool, 510; effect of temperature upon in vitro action of anticancer agents on vx2 carcinoma, 510

Cancer, surgery, Surgical management of advanced cancer of tongue, 22; factors influencing response to hypophysectomy for advanced breast, 34; operation for carcinoma of stomach, 49; improvement of cure rates for Schauta and Wertheim operations by more radical approach, 61; cancer of prostate gland, clinical and pathologic evaluation of patients treated by radical prostatectomy, 73; surgery of extensive cancer of paranasal sinus, 116; modified neck dissection for thyroid carcinoma, 120; bilateral radical neck dissection, 120; thiotepa in carcinoma of breast treated by bilateral adrenalectomy and oophorectomy, 132; clinical study of 5 year survivors after surgery for gastric carcinoma, 143; cervical carcinoma; radical hysterectomy and pelvic lymphadenectomy, 159; lymph node involvement after Wertheim-Meigs operation, 159; surgical treatment of cervical, recurring after primary irradiation therapy, 159; inguinal irradiation and lymph node excision in carcinoma of vulva, 161; contraindications to surgery for bronchogenic carcinoma in aged; usefulness of scalene lymph node biopsy, 241; radical surgical management of cancer of colon spread to tissues and organs beyond the colon, 256; indications and results of partial cystectomy in bladder carcinoma, 383; bronchial and tracheobronchial anastomoses in parenchyma-saving surgery of bronchial cancer, 452; long term results in surgical treatment of carcinoma of large bowel, 466; surgical treatment of cancer of cervix, 548

Carbon dioxide, Expired, as continuous guide of pulmonary and circulatory systems during anesthesia and surgery, 296

Carcinoids, Carcinoid tumors, carcinoid syndrome, and 5-hydroxytryptamine, 142; nonbenign nature of bronchial cylindromas and, 240; of appendix in children, 255; of stomach, 358; 463; metastasizing bronchial adenoma with atypical syndrome of, 536; of gastrointestinal tract, 541

Carotid body, Structure of tumor of, 119; tumors of, 339; extirpation of, as surgical therapy for bronchial asthma, 437; malignant tumors of, 437

Cerebrum, Artifacts in cerebral angiography, 25; combination of saccular aneurysm of pericallosal artery with anomalies of circle of Willis in carotid angiogram, 25; roentgenographic diagnosis of hemiatrophy of, and indications for hemispherectomy, 25; primary intraventricular tumors, 27; brain abscess in children, 121; cysticerosis of, 121; aneurysms of anterior communicating artery, 122; anticholinergic treatment of severe hidden trauma of, 122; primary traumatic pneumocephalos, 123; ventriculoatriostomy, technical note, accurate placement of distal end of shunt into right atrium without x-ray control, 124; angiography in vascular disease of brain, 225; layering of contrast medium in intracranial aneurysms during angiography, 225; simultaneous lateral and anteroposterior cerebral angiograms, 225; complications of cerebral angiography, 225; large saccular aneurysm of vertebrobasilar system, 225; analysis of occlusive disease of carotid artery and stroke syndrome, 226; complications of open heart surgery, 244; craniopharyngiomas, 341; cerebral angiography, 441; neurosurgical study of acute nonpurulent diffuse encephalitis, 441; subarachnoid hemorrhage and pregnancy, 441; alterations in acid base equilibrium in craniocerebral trauma, 442; experimental study on effects of hypothermia for concussion of, from aspect of relationship between astrocyte and edema of, 442

Cesarean section, For suspected erythroblastosis of newborn, 67; postoperative morbidity from, 269; repeat, 269; 374; fetal loss in, 477

Children, Differences between childhood and adult

thyroid carcinoma, 23; tumors of spinal canal in, 29; notes on intussusception in hospital for, 53; supracondylar fractures of humerus in, 83; brain abscess in, 121; report on 313 inguinal hernias repaired with nylon nets, 141; case for bilateral exploration of inguinal canals in, presenting unilateral inguinal hernias, 141; reappraisal of effects of antimicrobial therapy on course of appendicitis in, 148; clinical experience with radioactive iodopyracet, diodrast, renogram in, 169; changing concepts in lower urinary tract obstruction in, 173; idiopathic scoliosis during adolescence and childhood, 178; prognosis of medulloblastoma in, 227; brain abscess in congenital heart disease, 228; staphylococcal empyema in, 237; surgery of diaphragm in, 246; acute appendicitis in, 254; carcinoids of appendix in, 255; some lesions of colon in infants and, 299; glomus tumor in, 343; rhabdomyosarcomas in, 344; hemangiomas in infants and, 344; histiocytic tumors, fibrous xanthoma and histiocytoma, in, 345; pulmonary resection in infants and, 352; retroperitoneal tumors in infants and, 357; inguinal hernia in infants and, 357; origin, clinical experiences, and treatment of urinary obstructions of lower ureter in, 382; ureteroceles in infants and, 382; classification of ureteroceles in, 383; examination and surgical treatment of, with bronchiectasis and major vascular anomalies, 451; pulmonary resection for tuberculosis in, 451; mediastinal herniation after lung resection in, 452; anesthesia in newborns, infants, and young, 478; treatment of epicondylian fractures of humerus in, 487; traumatic dislocation of hip in, 488; traumatic dislocation of hip in, 489; empyema in, 535; acute perforation of alimentary tract in infants and, 541; fracture of neck of femur in, 561

Chloramphenicol, Acute poisoning from, in new born period, 71

Clavicle, Subclavian vein thrombosis associated with fractures of, 279; aseptic necrosis of, after neck dissection, 438

Cobalt, Treatment of cancer of bladder with radiocobalt and betatron, 78; focused grid telecobalt therapy, 100; angiographic findings before and after gamma radiation therapy (Co^{60}) of gliomas, 124; advantages, indications, and results of malignant tumor therapy with, 199; nasopharyngeal cancer, 300

Collagen, Ultrastructure of, in skin, scars, and keloids, 448

Collective review, Etiology of congenital developmental anomalies, 1; early management of atresia of esophagus, 103; smooth muscle tumors of esophagus, 205; hypothermia, 307; repair of flexor tendons in hand, 411; thrombosis and thrombolysis, 513

Colon, Diverticulosis of, 53; massive hemorrhage from, 53; pathology of ulcerative colitis, 54; observations on pathologic physiology of ulcerative colitis, 54; changing concepts in treatment of carcinoma of rectum and, 54; indications for operation and refinement of surgical technique in diverticula, diverticulosis, and diverticulitis of, 147; acute diverticulitis, 148; acute ulcerative colitis, 149; management of civilian injuries of, 149; occult invasive cancer in polypoid adenomas of rectum and, 150; fistulas of sigmoid flexure, 150; treatment of traumatic injuries of, 255; intestinal obstruction following total colectomy for ulcerative colitis, 255; radical surgical management of cancer of, spread to tissues and organs beyond, 256; practical implications of multiple tumors of rectum and, 257; some lesions of, in infancy and childhood, 299; reduction of absorption of mucosa of, with reference to chemical imbalance of ureterocolostomy, 304; improved technique of colectomy for ulcerative colitis and disseminated adenomatosis, 361; management of polyps of rectum and, 362; changing concepts of treatment of traumatic injuries of, 464; gross hemorrhage from presumed diverticular disease of, 464; diverticulitis of right, 464; segmental ulcerative colitis, 465; experience with 53 cases of skin level colostomy, 465; cancer of large bowel in young adult, 465; postoperative complications of surgery of, 466; long term results in surgical treatment of carcinoma of large bowel, 466; one stage abdominal proctocolectomy and ileostomy, 466; radiologic findings and prognosis in ulcerative colitis, 507; roentgenologic features of carcinoma in chronic ulcerative colitis, 580

Cortisone, Healed experimental gastric ulcer in rat; reulceration resulting from administration of, 45; corticotherapy in Rh-immunized pregnant women and value of exchange transfusion in newborn, 70; intravenous administration of, in shock, 291

Cranium, Clinical observations in intracranial extracerebral hematomas, 26; effects of intracranial disease on gastric secretion, 27; pathophysiology and therapy of increased pressure within, 28; craniosynostosis involving sagittal suture only, 121; urea in intracranial surgery, 122; pneumocephalos occurring with osteomas of paranasal sinuses, 123; identification of pathologic processes in posterior fossa of, by myodil ventriculography, 195; comparison of autologous and homologous bone grafts for cranioplasty, 221; cranioencephalic injuries caused by motor scooters, 228; intracranial complications of otogenic origin, 441; ultrasonics in diagnosis of intracranial space-occupying lesions, 442; alterations in acid-base equilibrium in craniocerebral trauma, 442

Cushing's syndrome, Therapy of, 79; 483

Cyst, Pilonidal, 129; hydatid, of mediastinum, 139; chylous, of mesentery in infants, 142; multilocular retrorectal, 150; surgical treatment for echinococcus, of liver, 152; calcified hydatid, 153; of vaginal wall, 261; congenital nasal dermoid, and fistulas, 337; refractures, pseudarthroses and, of navicular bone, 390; dermoepidermoid fissural, of face, 433; functioning parathyroid, 440; and benign tumors of esophagus, 456; developmental mesenteric, 460; clinical therapeutic study of median, and fistulas of neck, 526; angiography of temporal arachnoid, 527; pathogenesis of bronchogenic, of lung, 536; bronchogenic, of mediastinum, 539; operative cholangiography as part of surgical treatment of hydatid liver, 582

Cytology, Clinical appraisal of pulmonary, 36; diagnostic and prognostic value of oral smears in radiotherapy of carcinoma of oral cavity and oropharynx, 116; of tracheobronchial secretions collected by new technique, 134; diagnosis of lung cancer by means of, 134; vaginal smear in office practice, 158; and clinical manifestations of hypernephromas, 171; examination of sputum using Papanicolaou's technique, 239; diagnosis of carcinoma of large bowel by exfoliative, 256; late irradiation changes in vaginal, 261; cervical, in pregnancy, 266; in cases of postmaturity, 269; study of quantitative characteristics of exfoliated cells from female genital tract, 367; clinical value of peritoneal lavage for, 369; prognosis in carcinoma of cervix as determined by vaginal smear, 472; of endometrial cells, with aid of Papanicolaou's method and Hotchkiss-McManus reaction, 472; exfoliative, in gastric malignancy, 542; study of vulvovaginal smears in newborn premature infant, 552

Diabetes, Transmetatarsal amputations and arterial surgery in patients with, 178; pathophysiology and treatment of renal and enterorenal forms of calcium,

201; biochemical distinction between renal and enterorenal forms of calcium, 202; hypophysial-stalk section in treatment of advancing diabetic retinopathy, 229; clearance of radioactive sodium from myometrium of pregnant diabetic, 370; prevalence of, in women years after bearing a big baby, 550; birthweight of children of fathers with, 550

Dialysis, Scribner arteriovenous fistula for hemodialysis, 568

Diaphragm, Diagnosis and therapy of congenital defects of, 72; surgery of, in children, 246

Diverticulitis, Diverticula, diverticulosis, and, of colon, 147; acute, 148; surgical management of, 253

Duodenum, Hyperparathyroidism, parathyroid "adenomas," and peptic ulcer, 45; clinical and roentgenologic aspects of diverticula of, 50; malignant connective tissue neoplasms of, 51; cholangitis after choledochoduodenostomy, 57; late results of choledochoduodenostomy, 57; giant ulcers or walled-off perforation of, 144; ulcerogenic tumors of, 144; partial gastrectomy for ulcer of, 144; injuries of; analysis of 86 cases, 250; comparison of surgical treatments of ulcer of, 250; partial gastrectomy for chronic ulcer of, with hemorrhage, 250; vagotomy, pyloroplasty, and suture—safe and effective remedy for ulcer of, that bleeds, 251; hemigastrectomy and vagotomy in treatment of ulcer of, 251; catheter duodenostomy in gastrectomy, 252; right renal enlargements causing alterations in descending, 299; experiences with a Billroth I reconstruction following vagotomy and antrectomy for ulcer of, 359; fistulas of, 359; obstruction of, of congenital origin, 359; stenosis of, 360; accessory pancreas in stomach and, 365

Dupuytren's contracture, Incidence of, 88; dorsal approach for digital forms of, 130; etiology of, 233; limited fasciectomy for, 564

Dura mater, Study of subdural hematoma in subdural space, 26; homologous grafts of, 128; acute subdural hematoma, 227; use of homologous, in repair of hernias, 460

Ear, Otosclerosis and newer methods of surgical treatment, 20; total reconstruction of external auricle, 20; repair of traumatic myringorupture, 222; artificial stapes, 435; intracranial complications of otogenic origin, 441

Eclampsia, Treatment of, 267; results in 125 cases of, 267

Elbow, Injuries of, 388; tennis, 389

Electricity, Treatment of severe injuries due to, 294

Electrolytes, Method of regulating postoperative gastrointestinal electrolyte decompression losses, utilizing an improved watertight gastrostomy on controlled backpressure drainage, 187; series of 77 full thickness skin burns with necrectomy immediately after stabilization of, 400

Electrophoresis, Information obtained by, in slow unions of fractures of forearm, 279

Embolism, Surgical management of superior mesenteric arterial, 89; fat, 91; simple technique for retrograde embolectomy, 182; operative treatment of peripheral and mesenteric, 289; clinical features of pulmonary, 292; venous thrombosis and pulmonary, 495; pulmonary, 499; physical factors relating to gas, in blood, 574; silicone embolization during clinical and experimental heart surgery employing bubble oxygenator, 574; cerebral "fat," after extracorporeal circulation, 575

Emphysema, Treatment of, and other respiratory insufficiencies by tracheal fenestration, 135; surgical possibilities in treatment of, 238; surgical approach to pulmonary, 238

Empyema, Management of nontuberculous, 350; in childhood, 535

Endometriosis, Of cervix, 59; some clinicodiagnostic aspects of sigmoid, 544; effect of norethynodrel on, 549

Endometrium, Progestational agents in treatment of carcinoma of, 202; carcinoma of, 264; precursors of corpus cancer—III, appearance of cancer of, in estrogenically conditioned patients, 265; diagnostic cytology of cells of, with aid of Papanicolaou method and Hotchkiss-McManus reaction, 472; considerations on some histochemical characteristics of stroma of human, in normal and pathologic conditions, 549

Enzymes, Serum, in normal and toxemic pregnancy, 64; management of pulmonary complications of surgical operations, primarily atelectasis, with pancreatic dornase inhalations, 499; thrombosis and thrombolysis; collective review, 513; variations of serum levels of aldolase and lactic dehydrogenase in patients with malignant neoplasms, 586

Epilepsy, Uncinate sclerosis and, 123; relation of symptoms of, to pregnancy, delivery, and puerperium, 165

Epiphysis, Fractures of nucleus of; their end results and prognosis, 281

Esophagus, Horizontal laminagraphy; supplemental diagnostic method in tumors of lung, mediastinum, and, 36; experience with 3,000 cases of carcinoma of cardia and, 41; swallowing and dysphagia, 41; carcinoma of, 42; long term results of transthoracic extramucosal cardioesophagotomy with resection of left splanchnic and dorsal sympathetic chains in treatment of megaesophagus, 42; clinical aspects of carcinoma of, 42; early management of atresia of; collective review, 103; pathogenesis of rupture of varix of, 138; atypical congenital atresia of, 138; use of intact lung for closure of full thickness defects of, 139; blood supply of jejunum functioning as artificial, 139; esophagoscope with electrocardiographic electrode, 192; smooth muscle tumors of; collective review, 205; blood supply of, and its significance in surgery, 245; lower end of, 245; treatment of fibrous strictures of, associated with hiatal hernia, 245; diverticulum of, 245; phrenoesophageal ligament in hiatal hernia repair, 245; surgical management of reflux esophagitis, 247; treatment of regurgitant esophagitis by reconstruction of cardiac sphincter mechanism in patients with nondemonstrable hiatal hernia, 355; hiatal hernia as a complication of Heller's operation, 355; radiologic localization of hiatus of, as determined by intraluminal pressure measurements, 456; benign tumors and cysts of, 456; carcinoma of, 457; early portacaval shunt in selected cases of massive hemorrhage from varices of, 467; cirrhosis of liver and bleeding varices of, 545; on portacaval shunt for treatment of bleeding varices of, in bilharzial patients, 545

Extremities, Chronic venous insufficiency of lower, 183; diagnosis and differential diagnosis of vascular insufficiency of upper, 395; lymphography in venous diseases of lower, 397; liposarcoma of, 447; treatment of inequality of lower, 492

Eye, Goniopunctures; evaluation after 11 years, 19; experience with 12 cases of intraocular anterior chamber implants for aphakia, 19; focal ionizing radiation of posterior segment of, 20; central retinal and internal carotid arterial occlusions, 113; in dystrophia myotonica, 114; use of P^{32} in diagnosis of tumors of, 114; critiqué of time-amplitude ultrasonography, 114; clinical use of urea for reduction of pressure within, 114; cataract extraction by expression, 115; exenteration of orbit and repair by transplantation of temporalis muscle, 115; pressure changes in ophthalmic artery after carotid occlusion, 122; radiotherapy of malignant melanoma of, 198; end-to-side anastomosis for obstruction of nasolacrimal

duct, 221; postoperative complications of levator surgery, 222; hypophysial-stalk section in treatment of advancing diabetic retinopathy, 229; displacement of orbital floor and traumatic diplopia, 337; levator resection for minimal ptosis; another simplified operation, 337; significance of minor signs of, in headache of migraine type, 337; histogenesis of orbital endothelioma, 433; orbital reticulum cell sarcoma, 433; fibrinolysis in human, 433; pigmented tumors of, 434; intracapsular extraction of intumescent cataract by application of low temperature, 434

Eyelid, Swellings of, 20; treatment of palpebral bags, 346; investigation of vascularization of human, 434; surgical formation of fold of upper, 434; neuroblastoma presenting as ecchymosis of, 525

Face, Corrections of deformities of middle part of, 221; corrections of deformities of lower part of, 338; dermoepidermoid fissural cysts of, 433

Fallopian tubes, Corticosteroids in treatment of nonpatent, 62

Fat, Emboli, 91; fecal excretion of nitrogen and, after esophagogastrectomy in man, 253

Femur, Concomitant unilateral hip and shaft of, fractures, 283; displaced intracapsular fractures of neck of, 283; two-plane fixation in fractures of shaft of, 283; blood supply of neck and head of, in relation to damaging effects of nails and screws, 393; avascular necrosis of head of, 393; use of polyamide nails in fractures of neck of, and in pertrochanteric fractures, 394; analysis of forces producing fractures of proximal end of, 490; intramedullary nailing of comminuted fractures of shaft of, 490; traumatic luxation of hip joint associated with fractures of proximal extremity of, 560; mechanical factors of hip joints and their relationship to angle of shaft and neck of, 560; use of hip prosthesis in fractures of neck of, 561; inclination of fracture surface and its relation to rate of healing in fractures of neck of, 561; fracture of neck of, in childhood, 561

Fetus, Effect of analgesia and anesthesia on, 161; study of free gas in, as sign of intrauterine death, 268; distress of, 477; loss of, in cesarean section, 477; transverse presentation of, 550

Fibrinolysis, In human eye, 433

Finger, Arthrodesis of, 559

Fistula, Of sigmoid flexure, 150; surgical correction of salivary, 223; diagnosis and surgical treatment of pulmonary arteriovenous, 236; pathogenesis and treatment of anal, 257; congenital nasal dermoid cysts and, 337; duodenal, 359; diagnosis of internal biliary, 364; diagnosis and surgical management of rectourethral, 467; clinical therapeutic study of median cysts and, of neck, 526; traumatic bronchobiliary, 536

Foot, Subtalar arthrodesis in poliomyelitis, 87; combined fracture of base of fifth metatarsal and lateral malleolus, 493

Forearm, Information obtained by electrophoresis in slow unions of fractures of, 279; treatment of nonunion of, 279; pseudarthroses of, 280; experience with prophylaxis of posttraumatic pseudarthroses of, 280; nonunion of both bones of, 280; treatment of fractures of, 389; surgical indications in sequelae of fractures of shaft of, 389; nonunion of bones of, 389

Fractures, Of sternum, 35; supracondylar, of humerus in children, 83; surgical repair of patellar, 85; experimental study of compression in healing of, 85; problems of Küntscher nail, 86; arterial changes in experimental, of rabbit's tibia treated with intramedullary nailing, 86; classification of malar, 113; analysis of 319 case reports of mandibular, 116; pathologic, in comparison with admissions to Surgical University Clinic of Heidelberg, 1943–1959, 177; treatment of nonimpacted, of neck of humerus by medullary graft, 178; observations on nonunion of shafts of long bones, with statistical analysis of 842 patients, 179; treatment of dislocations and, of cervical spine complicated by cervical cord and root injuries, 231; of transverse apophysis of lumbar vertebrae, 277; subclavian vein thrombosis associated with, of clavicle, 279; treatment of nonunion of forearm, 279; complications and failures of surgery in various humeral, 279; information obtained by electrophoresis in slow unions of forearm, 279; pseudarthroses of forearm, 280; experience with prophylaxis of posttraumatic pseudarthroses of forearm, 280; nonunion of both bones of forearm, 280; conservative treatment of old, of carpal scaphoid, 281; of epiphysial nucleus; their end results and prognosis, 281; concomitant unilateral hip and femoral-shaft, 283; two-plane fixation in femoral shaft, 283; displaced intracapsular, of neck of femur, 283; in region of knee joint, 284; arterial changes in experimental, of monkey's tibia treated with intramedullary nailing, 285; displacement of orbital floor and traumatic diplopia, 337; internal fixation of, using homoplastic and heteroplastic bone, 386; supracondylar, of humerus, 388; injuries of elbow, 388; surgical indications in sequelae of, of shaft of forearm, 389; nonunion of bones of forearm, 389; treatment of forearm, 389; refractures, pseudarthroses, and cysts of navicular bone, 390; avascular necrosis of femoral head, 393; blood supply of femoral neck and head in relation to damaging effects of nails and screws, 393; use of polyamide nails in, of neck of femur and in pertrochanteric, 394; treatment of pseudarthroses within last 20 years, 486; treatment of complex, of upper end of humerus, 489; treatment of epicondylian, of humerus in child, 489; sequelae of hip dislocations and fracture-dislocations, 489; analysis of forces producing, of proximal end of femur, 490; intramedullary nailing of comminuted, of femoral shaft, 490; of tibial plateau—surgical therapy and functional recuperation, 491; reconstruction—arthrodesis for oscalcis, 492; combined, of base of fifth metatarsal and lateral malleolus, 493; management of maxillary, 525; supracondylar and intercondylar, of humerus in adult, 559; traumatic luxation of hip joint associated with, of proximal extremity of femur, 560; inclination of surface of, and its relation to rate of healing in femoral neck, 561; of neck of femur in childhood, 561

Gallbladder, Practical technique for routine use of operative cholangiography, 55; transcutaneous intrahepatic cholangiography in biliary obstruction, 56; cholecystography and cholegraphy in gallstone disease, 56; passage of calcium into, through its wall, 56; unsuspected carcinoma of, in acute and chronic cholecystitis, 154; adenomyomatosis of, 197; surgical management of acute cholecystitis, 259; comparative trial of telepaque and biloptin, 299; acute cholecystitis; its etiology and course, with special reference to timing of cholecystectomy, 364; carcinoma of, 364; primary carcinoma of, 364; evaluation of new cholecystographic agent, 404; intestinal obstruction due to gallstones, 463; percutaneous transhepatic cholangiography, 507

Gastrectomy, Proximal, with anastomosis to prevent esophageal regurgitation, 47; subtotal, for bleeding peptic ulcer, 48; on pathophysiology of agastric patients, 49; primary cancer in stomach pouch after, 50; control of gastric function after subtotal, 143; partial, for duodenal ulcer, 144; efferent loop dumping syndrome and its relation to intestinal absorption

as studied by an intubation technique, 145; partial, for chronic duodenal ulcer with hemorrhage, 250; gastroduodenal perforation; report of 120 cases over 5½ year period with consideration of role of primary, 251; catheter duodenostomy in, 252; afferent loop syndrome, 252; fecal excretion of fat and nitrogen after esophagogastrectomy in man, 253; some psychiatric consequences of, 359; gastric carcinoma following gastroenterostomy and partial, 462; delayed afferent loop obstruction following partial, 544

Gastrointestinal tract, Pituitary adenoma and peptic ulcer disease, 46; adrenal glands and peptic ulcer, 46; proximal gastrectomy with anastomosis to prevent esophageal regurgitation, 47; endocrine adenomas and peptic ulcer, with special reference to pancreatic adenomas, 47; resection of cardia for bleeding after splenectomy, 47; study of gastric secretory pattern in surgery of gastric and duodenal ulcer, 48; sarcomas of, 52; carcinoid tumors, carcinoid syndrome, and 5-hydroxytryptamine, 142; symptoms and signs in prognosis of gastroduodenal ulcers, 143; method of regulating postoperative gastrointestinal electrolyte decompression losses, utilizing an improved watertight gastrostomy on controlled backpressure drainage, 187; gastroduodenal perforation; report of 120 cases over 5½ year period with consideration of role of primary gastrectomy, 251; afferent loop syndrome, 252; multiple lymphomatous polyposis of, 358; gastroduodenal metastases from carcinoma of breast, 450; unrecognized sign of gastroduodenal perforation, 463; metabolic disorders in disease of, 463; carcinoids, 463; biliodigestive anastomoses, 468; endoscopic examination of stomach and duodenal cap with fiberscope, 506; acute perforation of the alimentary tract in infancy and childhood, 541; carcinoid tumors of, 541; gas gangrene following perforation of alimentary canal, 541; simple benign prepyloric ulcer, 579; barium studies in aged, 580

Genitalia, female, Pelvic abscess, 59; subdivision of intraepithelial carcinoma, 60; secondary amenorrhea, 62; gynosterosan in treatment of leukorrhea, 63; investigations on clinical significance of "hemophilus vaginalis," 157; incidence of pelvic malignancies following irradiation for benign gynecologic conditions, 157; vaginal smear in office practice, 158; demonstration of tumor cells in blood in cancer of, 158; dyspareunia following vaginal operations, 261; gynecologic celioscopy, 263; genital prolapse, 263; treatment of malignant trophoblastic growth in women, with special reference to amethopterin, 264; gynecography, 299; study of quantitative characteristics of exfoliated cells from, 367; abnormal uterine bleeding subsequent to pelvic surgery, 368; intraarterial infusions of pelvic tumors with amethopterin, 369; clinical value of peritoneal lavage for cytologic examinations, 369; frequency and significance of infection of urinary tract in trichomoniasis in women, 381; role of combined surgery and radiation in treatment of cancer of reproductive system, 406; use of gynecography in pelvic diagnosis, 471; diagnostic value of routine hysterography in cases of metrorrhagia, 471; estimation of chorionic gonadotropin in placental tissue and urine as means of early detection of invasive mole and chorion carcinoma, 471; relocation and recession of enlarged clitoris with preservation of glands; alternative to amputations, 473; tubal insufflation and hysterosalpingography, 547; radioisotope renogram, 547; results of treatment of genital cancer, 548

Genitalia, male, Varicocele; treatable cause of subfertility, 377; epididymitis, 479; structure of testis and regulation of its function, 480; diagnosis and treatment of male infertility, 480; flagyl in treatment of male trichomoniasis, 483; technique of vasectomy for prevention of epididymitis after prostatectomy, 553; tuberculous epididymitis, 555

Geriatrics, Contraindications to surgery for bonchogenic carcinoma in aged; usefulness of scalene lymph node biopsy, 241; anatomic study of senile shoulder, 487; coarctation of aorta in older patients, 538; barium studies in aged, 580

Glaucoma, Goniopuncture; evaluation after 11 years, 19; intravenous hypertonic urea in management of acute angle-closure, 337

Grafts, Facial nerve, 125; homologous dura mater, 128; exposure in free split-thickness skin, 130; use of molded splint to prevent contracture after skin, on neck, 130; observations on nonunion of shafts of long bones, with statistical analysis of 842 patients, 179; review of 7 years' experience with excision and replacement with, in 150 ruptured and unruptured aneurysms of abdominal aorta, 181; use of nerve, for repair of defects in facial nerve, 230; blood supply and survival of autogenous spongiosa, 275; use of bone, in reparative orthopedic surgery, 275; homoplastic frozen milled, 275; autogenous vascular, 397; vascular replacement in grossly contaminated wounds, 397; histologic observations of aortic teflon, in normal dogs after 5 years, 397; effects of glycerol and freezing on skin homografts, 410; microlymphangiographic studies of experimental skin homografts, 531; microlymphangiographic studies of experimental skin autografts, 531; ivalon surgical sponge used as temporary cover of experimental skin defects in rats, 531; water and hexosamine content in linear wounds, autotransplants, and pedicled, 531; skin, in relation to regional function, 532; treatment of syndactylia by means of "inlay," 532; skin, in traumatic lesions of hand, 533; healing of defects in immobile skin in rabbits, 533; studies in segmental replacement of thoracic trachea, 535; porosity; primary determinant of ultimate fate of synthetic vascular, 568; experimental vein, in portal venous system, 568

Hand, Tumors of, 31; chronic professional radiodermatitis of, 31; treatment of infection of, 31; effect of chymar on postoperative swelling of, 32; dorsal approach for digital forms of Dupuytren's contractures, 130; grease-gun injuries of, 345; repair of flexor tendons in; collective review, 411; surgical treatment of syndactylia of, 449; immediate repair of flexor tendons, 493; skin grafting in traumatic lesions of, 533; results of tendon injuries in fingers and thumb after long delay, 566

Head, Fingertip plethysmography in injuries of, 96; case of intractable pain in face and, associated with pathologic changes in optic thalamus, 125; urea in management of injuries of, 228; simultaneous irradiation and regional intra-arterial perfusion with nitrogen mustard for extensive cancers of neck and, 305; extracranial neurogenic tumors of neck and, 341; angiography in injuries of, 441; electrocardiographic changes in injuries of, 442

Heart, Etiology of congenital developmental anomalies; collective review, 1; experimental study about influence of open heart surgery upon output of, 39; intracardiac knotting of catheter during catheterization of right side of, 39; homovital transplatation of, 41; poststenotic dilatation of ascending aorta; its occurrence and significance as roentgenologic sign of aortic stenosis, 100; malformations of, in rats induced by exposure of mother to carbon dioxide during pregnancy, 100; incidence of arrhythmias of, following noncardiac thoracic surgery, 136; gas determinations in anoxic standstill of, and coronary

perfusion, 138; arrest of, in obstetrics, 162; experiences with 710 angiograms of great vessels and, 196; cardiovascular dynamics of vasovagal reactions in man, 201; brain abscess in congenital disease of, 228; penetrating wounds of, 241; differentiation of valvar, subvalvar, and supravalvar aortic stenosis, 242; peripheral pulmonary sclerosis, 242; aneurysms of previously ligated patent ductus arteriosus, 243; arrhythmias of, following surgery within, 244; neurologic and electroencephalographic findings in patients with congenital defects of, operated upon under hypothermia, 295; left retrograde cardioangiography; its diagnostic value in acquired and congenital disease of, 297; evaluation of cardiovascular contrast media, 298; effect of hypothermia on experimentally produced arrhythmias, 303; hypothermia; collective review, 307; roentgenologic aspects of chronic cor pulmonale, 350; limitations of present techniques in precise diagnosis of interatrial septal defects and description of experimental method of visualization, 352; 10 years' experience with penetrating injuries of, 354; study of 33 cases of congenital corrected transposition of great vessels, 354; atresia of mitral valve, 354; blind ductus arteriosus, 396; use of "radiopaque streamers" to show blood currents in, 403; surgical anatomy of left atrium, 453; evaluation of surgical correction of mitral regurgitation, 453; surgery of atrial myxoma, 453; current concepts of surgical treatment of aortic stenosis, 454; correction of aortic regurgitation using plastic valves, 454; infundibular pulmonic stenosis with intact ventricular septum, 454; anatomic and clinical picture of isolated upper ventricular septal defects, 455; transfer of coronary ostia by "triangulation" in transposition of great vessels and anomalous coronary arteries, 455; repair of ventricular septal defect in infancy, 455; longevity in tetralogy and trilogy of Fallot, 455; late complications after plastic reconstruction of outflow tract in tetralogy of Fallot, 456; intracardiac myxomas with report of 2 unusual cases and successful removal, 456; contrast examinations of cardiovascular system during increased intrabronchial pressure, 538

Heart, surgery, Surgical repair of ruptured aneurysm of sinus of Valsalva in 2 patients, 39; internal mammary-coronary artery anastomosis, 39; pulmonary artery banding, 39; experimental study about influence of open, upon cardiac output, 39; atrial septal defects of sinus venosus type; surgical considerations, 40; transventricular mitral commissurotomy, 40; transventricular mitral valvulotomy under controlled hypotension, 40; results of 348 mitral commissurotomies for mitral stenosis, 40; reoperation for mitral stenosis, 40; hypothermic perfusion and circulatory arrest for surgical correction of tetralogy of Fallot with previously constructed Potts' anastomosis, 41; arterial complications incident to cannulation in open, 90; profound hypothermia in open, 96; open, for mitral regurgitation and stenosis, 136; perfusion technique for surgery on aortic valves, 137; transposition of great vessels; surgical palliation during infancy, 137; simplified technique for detection of patent ductus arteriosus and other left-to-right shunts originating from aorta, 137; changes in blood coagulation due to perfusion for, 186; moderate hypothermia in operation for patent ductus arteriosus, 190; profound hypothermia in, 190; atrial septal defect, 242; blood loss and transfusions during closed cardiovascular operations, 243; long term results of aortic-pulmonary anastomosis for tetralogy of Fallot, 243; endocarditis complicating open, 244; cardiac arrhythmias following intracardiac surgery, 244; cerebral complications of open, 244; complete correction of tetralogy of Fallot, 355; reduction in flow in open, 538; new treatment for complete correction of transposition of great vessels, 539; treatment of complete transposition of great vessels with Blalock-Hanlon operation, 539; experiences with intracardiac procedures performed under hypothermia and with extracorporeal circulation, 573; silicone embolization during clinical and experimental, employing bubble oxygenator, 574; blood loss and replacement during bypass operations, 574

Heel, Repairs of, 533

Hemorrhage, Massive colonic, 53; acute, and necrosis of intestines associated with digitalization, 145; from gastritis, 247; factors influencing mortality in bleeding peptic ulcer, 252; transthoracic ligation of celiac axis in treatment of hepatic cirrhosis and, due to portal hypertension, 258; subarachnoid, and pregnancy, 441; hydrocephalus in adult following spontaneous subarachnoid, 443; gross, from presumed diverticular disease of colon, 464; early portacaval shunt in selected cases of massive, from esophageal varices, 467; effect of epsilon aminocaproic acid on bleeding after prostatectomy, 479

Hemorrhoids, Appraisal of radical hemorrhoidectomy, 257

Heparin, Treatment of peritenomyosis (peritendinitis) crepitans acuta with, 286

Hernia, Parasternal and lumbocostal diaphragmatic, 43; late results of repair of hiatus, 44; considerations on 33 cases of diaphragmatic, 44; diagnosis and therapy of congenital diaphragmatic defects and hiatus, in newborn and young infants, 72; management of esophageal hiatus, and associated abnormalities with balanced operations, 140; disposition to inguinal, 141; report on 313 inguinal, repaired with nylon nets, 141; case for bilateral exploration of inguinal canals in pediatric patients presenting unilateral inguinal, 141; simultaneous retropubic prostatectomy and inguinal herniorrhaphy, 142; treatment of fibrous strictures of esophagus associated with hiatal, 245; phrenoesophageal ligament in repair of hiatal, 245; hiatal, as a complication of Heller operation, 355; treatment of regurgitant esophagitis by reconstruction of cardiac sphincter mechanism in patients with nondemonstrable hiatal, 355; inguinal, in infancy and childhood, 357; relief of anemia by repair of hiatus, 457; repair of epigastric incisional, 460; use of homologous dura mater in repair of, 460; through foramen of Morgagni, 460; of sacrum after amputation of rectum, 467; hiatus, 540

Hip, Tuberculosis of, in adults, 83; treatment of congenital dislocation of, 83; mechanism of "click" in unilateral congenital subluxation of, 83; shelf operation in adults, 84; surgical treatment of architectural faults of, 282; resection and subtrochanteric osteotomy in treatment of painful, with diminished motion, 282; ischiofemoral arthrodesis, 282; Crawford Adams cup arthroplasty, 282; concomitant unilateral, and femoral-shaft fractures, 283; congenital dislocation of, 391; compression arthrodesis of, 391; Charnley stabilization of, 392; McMurray osteotomy, 392; varus osteotomy of Pauwels in treatment of coxarthrosis, 392; postoperative examination of congenital dysplastic, after intertrochanteric fixation and derotation osteotomy, 393; spontaneous aseptic necrosis, 393; displacement osteotomy in treatment of osteoarthritis of, 487; results of treatment of congenital dislocation of, 488; traumatic dislocation of, in childhood, 488; traumatic dislocation of, in children, 489; sequelae of dislocations of, and fracture-dislocations, 489; surgical treatment of arthrosis of, 560; traumatic luxation of, associated with fractures

of proximal extremity of femur, 560; mechanical factors of, and their relationship to femoral neck-shaft angle, 560; use of prosthesis in femoral neck fractures, 561

Hodgkin's disease, In bone, 562

Hormones, Secondary amenorrhea, 62; chorionic gonadotropins in treatment of early spontaneous abortion, 68; estrogen excretion of patients with breast cancer, 131; survival of patients with "recurrent" or inoperable carcinoma of breast with special consideration of effect of treatment with, 131; suppression of postpartum lactation and prevention of breast engorgement in nonnursing mothers, 165; progestational agents in treatment of carcinoma of endometrium, 202; advanced malignant neoplasms treated with nitrogen mustard and, 204; treatment of prostate disorders with, 271; effect of various synthetic estrogens on respiration of ascites tumor cells in vitro, 409

Humerus, Supracondylar fractures of, in children, 83; treatment of nonimpacted fractures of neck of, by medullary graft, 178; complications and failures of surgery in various fractures of, 279; supracondylar fractures of, 388; treatment of complex fractures of upper end of, 489; treatment of epicondylian fractures of, in child, 489; supracondylar and intercondylar fractures of, in adults, 559

Hydrocephalus, Septicemia due to colonization of Spitz-Holter valves by staphylococci, 228; accurate placement of ventriculoatrial shunt for, under electrocardiographic control, 341; arrested, 443; in adult following spontaneous subarachnoid hemorrhage, 443

Hypnosis, Experiences with, on surgical service, 499

Hypophysectomy, Factors influencing response to, for advanced cancer of breast, 34

Hypophysis cerebri, Histologic and histochemical aspects of, in course of prolonged artificial hypothermia, 95; alterations in area of anterior clinoid processes due to expansively growing tumors, 226; section of stalk of, in treatment of advancing diabetic retinopathy, 229; delayed radionecrosis of brain following therapeutic x-radiation of pituitary, 443; hypophysectomy and radioactive gold implants in treatment of metastatic carcinoma of breast, 443; water intoxication after hypophysectomy; unusual case, 443; infrequent modification of morphology of optic chiasm and optic nerve in tumors of, 529

Hypospadias, Its treatment, 167; 272; new orientations in plastic repair of, 554; 20 year review of 489 cases of, 554

Hypothermia, Experimental studies on, 95; histologic and histochemical aspects of adrenal gland in course of prolonged artificial, 95; histologic and histochemical aspects of hypophysis in course of prolonged artificial, 95; profound, in open heart surgery, 96; trials with new heat exchanger for deep, 96; local, of urinary bladder during transurethral surgery, 174; technique and physiopathology of moderate, 190; moderate, in operation for patent ductus arteriosus, 190; profound, in cardiac surgery, 190; sensitivity of hypothermic mammals to x-irradiation, 191; central nervous system in, 191; improved method of rewarming after, by exposure of head to cold air, 191; effect of, on experimentally induced hemorrhagic pancreatic necrosis, 201; neurologic and electroencephalographic findings in patients with congenital cardiac defects operated upon under, 295; cerebral metabolic studies on human during total cerebral arterial occlusion and, 295; effect of, on experimentally produced arrhythmias, 303; collective review on; 307; technique of controlled, in brain operations, 401; experimental study on effects of, for cerebral concussion from aspect of relationship between astrocyte and cerebral edema, 442; survival and physiologic studies with profound hypothermia, 0 to 8 degrees C., and pump oxygenator in dogs, 502; tolerance of circulatory arrest in deep, by extracorporeal cooling, 502; preservation of living tissue in frozen state, 503; experiences with intracardiac procedures performed under, and with extracorporeal circulation, 573

Immunity, Natural resistance to infectious diseases during pregnancy; possible relationship to serum properdin concentration, 64

Infants, Etiology of congenital developmental anomalies; collective review, 1; absent umbilical artery, 65; malignant renal tumors in, 76; mechanism of "click" in unilateral congenital subluxation of hip, 83; treatment of congenital dislocation of hip, 83; early management of atresia of esophagus; collective review, 103; transposition of great vessels; surgical palliation in, 137; chylous cysts of mesentery in, 142; exsanguinotransfusion with heparinized fresh blood, 163; spinal cord tumors in, 231; use of kanamycin sulfate as therapeutic agent for children and, 294; some lesions of colon in children and, 299; hypoplasia of mandible with glossoptosis in, 338; hemangiomas in children and, 344; pulmonary resection in children and, 352; retroperitoneal tumors in children and, 357; inguinal hernia in children and, 357; ureteroceles in children and, 382; suppurative arthritis of, 386; repair of ventricular septal defect in, 455; discussion on congenital pyloric stenosis, 462; meconium peritonitis; prognostic significance, 463; epidemiology of acute intussusception, 466; anesthesia in newborns, young children, and, 478; acute perforation of alimentary tract in children and, 541; birthweight of children of diabetic fathers, 550; prevalence of diabetes in women years after bearing a big baby, 550

Infections, Treatment of hand, 31; effect of antibacterial nasal cream on nasal colonization and, in newborn, 71; staphylococcal epidemiology on surgical ward, 94; laboratory studies on purified penicillinase of Bacillus subtilis, 94; in vitro activity of various penicillins, 94; septicemia due to colonization of Spitz-Holter valves by staphylococci, 228; problem of neonatal umbilicus and its relation to incidence of sepsis in a maternity unit, 268; detection of outbreak of staphylococcal, of perineal tears by routine phage typing, 269; bacteremia following retropubic prostatectomy, 271; use of kanamycin sulfate as therapeutic agent for infants and children, 294; staphylococcal, of newborn in hospital and domiciliary practice, 376; frequency and significance of urinary tract, in trichomoniasis in women, 381; postoperative sepis, 400; prevention of, after cystoscopy; use of new antibacterial agent, 483; flagyl in treatment of male trichomoniasis, 483; effective period of preventive antibiotic action in experimental incisions and dermal lesions, 500; new penicillins, 500; psuedomonas bacteremia; review of 91 cases, 501; surgical aspects of amebiasis, 570; protection of contaminated deep wounds against, by intraperitoneal neomycin solution, 571; nitrofurantoin—furadantin, 571; investigations on the occurrence and distribution of Staphylococcus aureus, 572; of surgical wounds with Clostridium welchii, 572

Instruments and apparatus, Vacuum extraction, 69; preliminary report on use of Malmström's vacuum extractor, 163; double-helical reservoir heart-lung machine, 192; esophagoscope with electrocardiographic electrode, 192; personal experience with laparoscopy, 194; measurement of blood volume

with new apparatus, 402; ultrasonics in diagnosis of intracranial space-occupying lesions, 442; experiences with vacuum extractor, 475; endoscopic examination of stomach and duodenal cap with fiberscope, 506; coronary suction device, 506; roto-drill, new instrument for thromboendarterectomy, 576

Intestine, Plication of small, in treatment of adhesions and adhesive obstruction of small, 52; obstruction of, 52; experimental strangulated obstruction of, 52; efferent loop dumping syndrome and its relation to absorption of the, as studied by an intubation technique, 145; acute hemorrhage and necrosis of, associated with digitalization, 145; results of surgical treatment of chronic regional enteritis, 146; anemia associated with dilated blind segments of small, after side-to-side anastomosis, 146; Whipple's disease, 146; malignant tumors of small, 147; Meckel's diverticulum, 147; clinical manifestations of duplication of, 148; study of 41 cases of surgical excision of a Meckel's diverticulum, 253; concepts in surgical treatment of regional enteritis, 254; abnormalities of rotation of bowel, 255; obstruction of, following total colectomy for ulcerative colitis, 255; implantation from bowel lumen in cancer of large, 256; diagnosis of carcinoma of large, by exfoliative cytology, 256; decompression of; use of long tube with coiled spring for relief of distention without enterotomy or enterostomy, 296; tumors of small, 361; regional enteritis, 361; obstruction of, due to gallstones, 463; one stage abdominal proctocolectomy and ileostomy, 466; effect of antibiotics in strangulation of, 500; ureteral obstruction from regional enteritis, 544

Intussusception, In children's hospital, 53; current treatment of, 197; epidemiology of acute, 466

Jaundice, Fatty liver presenting as obstructive, 152; idiopathic, of pregnancy, 267

Jaw, Nature of masseteric hypertrophy, 19; classification of malar fractures, 113; analysis of 319 case reports of mandibular fractures, 116; metastasis of malignant tumors of, 117; cosmetic repair for retrusion of mandible, 222; hypoplasia of mandible with glossoptosis in infants, 338; immediate reconstruction of mandible in tumor surgery, 338; corrections of deformities of lower part of face, 338; surgical correction of open bite deformities by oblique sliding osteotomy, 435; management of maxillary fractures, 525

Jejunum, Use of, in upper abdominal surgery and comparison with esophagogastrostomy, 360

Joints, Calcific tendinitis of shoulder, 278; complete dislocation and subluxation of acromioclavicular, 278; treatment of septic, 385; treatment of sequelae of burns of major, 533; finger arthrodesis, 559; anatomic observations on question of "denervation" of, 563; arthrographic diagnosis of discoid meniscus, 578

Kanamycin, Use of, as therapeutic agent for infants and children, 294

Kidney, Nonvisualizing, 75; urologic aspects of renal hypertension, 75; papillary necrosis of, 75; closed injury of, 75; malignant tumors of, in infancy, 76; indications and techniques for renovascular surgery on hypertensive patients, 90; value of pyelonephrotomography in diagnosis of benign and malignant tumors of, 100; clinical experience with radioactive iodopyracet, diodrast, renogram in pediatric subjects, 169; experimental hydronephrosis, 169; transposition of lower polar vessels; operative approach to hydronephrosis, 169; bilateral nephrolithiasis, 169; retrograde renal arteriography in course of arterial hypertension, 170; etiologic treatment of arterial hypertension of presumed unilateral renal origin, 170; clinical manifestations and cytology of hypernephromas, 171; diagnosis of malignancy of renal pelvis, ureter, and, 171; optimum time for dialysis in acute reversible failure of, 171; anterior nephroureterectomy; advantages and limitations of single incision, 171; observations on homotransplantation of, 172; homotransplantation of, in man, 172; surgical treatment of hypertension due to renal vascular lesions, 183; evaluation of radioactive renogram in hypertension, 199; pathophysiology and treatment of renal and enterorenal forms of calcium diabetes, 201; biochemical distinction between renal and enterorenal forms of calcium diabetes, 202; effect of parathyroidectomy on incidence of calculi in, 224; disease of, with associated hypertension, 273; surgical treatment of multiple, recurrent, branched, renal, staghorn, calculi by pyelonephroileovesical anastomosis, 273; conservative surgery in tuberculosis of, 273; new conceptions in treatment of primary cancer of, in adult, 273; enlargements of right, causing alterations in descending duodenum, 299; radiation nephritis in adults and children; effects of radiation on growing bones, 300; thoracic ectopia of, 379; Wilms's tumor; epidemiologic experience, 379; primary tumors of pelvis of, and ureter, 379; renal pelvic pressure levels in management of nephrostomy, 379; mannitol infusion, 380; dangers of extracorporeal dialysis, 380 radioisotope nephrogram obtained with urografin tagged with iodine 131, 408; technique, interpretation, and indications for radioisotope nephrogram, 481; serial renal vasography as fundamental diagnostic method in surgery of, 481; serum creatinine and endogenous creatinine clearance as tests of function of, 481; bilateral nephroblastoma—Wilms's tumor, 481; Wilms's tumor, 482; radioisotope renogram, 547; clinical manifestations and therapy of trauma, 556; further experiences with occlusion of pedicle of, 556; some studies in experimental hypertension of, 556; surgical treatment of nephroptosis, 557; role of ureter in transplantation of, 557; roentgenologic treatment of Wilms's tumor, 583

Knee, Results of conservative treatment of tuberculosis of, 84; synovectomy in treatment of tuberculosis of, 84; meniscus ganglia, 85; fractures in region of, 284; fabellofibular and short lateral ligaments of, 284; reconstructive surgery of, 285; arthroplasty of, 491; Judet operation for posttraumatic stiff, 491

Labor, Metabolic problems in delivery of diabetic women, 67; indications for and methods of induction of, 68; vacuum-extraction, 69; obstetric delivery of dyspneic patients, 69; effect on mother and child of ascending infection in, 69; mechanism of, in face and brow presentation, 69; preliminary report on use of Malmström's vacuum extractor, 163; x-ray pelvimetry, 163; use of oxytocin and vasopressin in obstetrics and gynecology, 164; transbuccal pitocin; new method for induction of, 164; Kielland's forceps rotation in first stage of, 164; compound presentations, 165; relation of epileptic symptoms to pregnancy, delivery, and puerperium, 165; cytologic picture in cases of postmaturity, 269; causes of premature, 373; analgesia during; comparison of pentobarbital, meperidine, and morphine, 374; usefulness of paracervical block in obstetrics, 374; effect of chlorpromazine and promazine on progress of, 375; dysfunctional, 375; compound presentation, 375; subsequent obstetric performance of patients meeting historical criteria for cervical incompetence, 475; experiences with vacuum extractor, 475; induction of, in Rh-immunized patient, 476; external cephalic version

under anesthesia, 476; adrenaline, noradrenaline, and serotonin estimations in urine and amniotic fluid during delivery, 477; fetal distress, 477; uterine rupture, 548; transverse presentation of fetus, 550; prolonged, 550

Lactation, Suppression of postpartum, and prevention of breast engorgement in nonnursing mothers, 165

Larynx, Incidence of cervical lymph node metastases from epidermoid carcinoma of, and their relationship to certain characteristics of primary tumors, 24; cylindroma (adenoid-cystic carcinoma) of trachea and, 24; use of prostheses in treatment of cicatricial stenoses of, 35; sarcoma of, 223; place of radiotherapy in treatment of cancer of, 436

Leukotomy, Observations on selective, 227

Levophed, By intramuscular route, 188

Ligaments, Injuries to medial, of ankle, 86; reconstruction of collateral and cruciate, employing frozen heterologous tendon, 179

Lips, Clinical experiences with vermilion bordered flap of, 532

Lips, cleft, And cleft palate in Tasmania, 21; new aspects on correction of unilateral, 21

Liver, Needle biopsy of, 55; function of, in disease and in preoperative evaluation, 55; circulation and corrective surgery for portal hypertension, 55; catalase in human, 101; needle biopsy of, in 197 patients with metastatic tumors of, 151; several indications for periarterial hepatic neurectomy, 152; fatty, presenting as obstructive jaundice, 152; surgical treatment for echinococcus cysts of, 152; percutaneous splenoportogram and intrasplenic adrenalin test in cirrhosis of, 197; transthoracic ligation of celiac axis in treatment of cirrhosis of, and hemorrhage due to portal hypertension, 258; splenoportographic characteristics of tumors of upper abdomen and, 258; experimental study of hepatic periarterial neurectomy, 303; intrahepatid calculi, 363; biliary calculosis within, 468; cirrhosis of, and bleeding esophageal varices, 545; on portacaval shunt for treatment of bleeding esophageal varices in bilharzial patients, 545; new technique for hepatic phlebography, 582; operative cholangiography as part of surgical treatment of hydatid cysts of, 582

Lung, Early diagnosis and prognosis of bronchial carcinoma, 35; importance of angiographic diagnosis in intralobar pulmonary sequestration, 36; horizontal laminagraphy; supplemental diagnostic method in tumors of esophagus, mediastinum, and, 36; differential diagnosis between carcinoma and inflammatory changes in cortex of, by bronchography, 36; clinical appraisal of cytology of, 36; round foci and tuberculomas of, 37; pyogenic abscess of, 37; spontaneous pneumothorax with a review of 95 cases, 37; prognosis and treatment of empyema after pneumonectomy, 38; experimental and clinical studies on prevention of bronchial fistula following resection of, 38; resection in treatment of tuberculosis of, 38; injection of air into mediastinum in preoperative diagnosis of bronchogenic carcinoma, 43; metastases from bronchogenic carcinoma in bones of hand, 81; treatment of respiratory insufficiency by means of artificial ventilation during postoperative period, 92; angiocardiography in bullous emphysema; its role in selection of case suitable for surgery, 99; transsomatic vertebral phlebography in diagnosis of mediastinum and, 99; cytologic diagnosis of cancer of, 134; reconstruction of raw surface after segmental resection of, 136; causes of death after resection of, 136; use of intact, for closure of full-thickness esophageal defects, 139; early secondary thoracotomy following resection of, 235; elective tracheostomy in patients with respiratory insufficiency who are subjected to surgery of, 236; diagnosis and surgical treatment of arteriovenous fistula of, 236; unilateral hypoventilation in man during temporary occlusion of one artery of, 236; bronchi in sarcoidosis of, 236; staphylococcal empyema in children, 237; pseudotumoral form of bronchopulmonary aspergillosis, 237; pneumonycosis and surgery of, 237; surgical approach to emphysema of, 238; surgical possibilities in treatment of emphysema, 238; resection of, with mechanical suture, 238; efficiency of preoperative endoscopy in diagnosis of primary bronchogenic carcinoma in 304 patients, 240; pneumomediastinography in carcinoma of, 240; peripheral bronchial carcinoma, 240; multiple primary bronchogenic carcinoma, 241; evaluation of, and risk in patient preparation for anesthesia and surgery, 291; clinical features of embolism in, 292; circulation of primary lobule of, 350; roentgenologic aspects of chronic cor pulmonale, 350; management of nontuberculous empyema, 350; incidence and prognostic significance of blood vessel invasion in bronchial carcinoma, 351; cancer of, among Indians of southwestern United States, 351; carcinoma of, 351; result of 119 operations for bronchopulmonary cancer, 352; resection of, in infancy and childhood, 352; some consequences of irradiation of, 407; hemodynamic study of pulmonary circulation after resectional surgery of, in 26 patients, 409; examination and surgical treatment of children with bronchiectasis and major vascular anomalies, 451; resection of, for tuberculosis in children, 451; lymphatic propagation and reticuloendothelial reaction in 92 cases of cancer of, 451; surgical treatment of primary malignant lymphoma of, 452; bronchial and tracheobronchial anastomoses in parenchyma-saving surgery of bronchial cancer, 452; mediastinal herniation after resection of, in children, 452; surgical therapy of extracardiac anomalous drainage of, 454; pathogenesis of bronchogenic cysts of, 536; treatment of superior sulcus tumor by irradiation followed by resection, 536; results of treatment of carcinoma of, 537; solitary lesion of, 537; changing concepts in therapy of abscess of, 537; theoretical factors that may influence long term survival in cancer of, 537; asymptomatic residual air space after partial resection of, 538

Lymph nodes, Anatomopathologic study of prescalene, in 71 subjects with various forms of epithelial malignant tumors, 134; involvement of, after Wertheim-Meigs operation, 159

Lymphatic system, Radiographic studies of, 184; diagnostic and therapeutic potential of lymphangiograms, 184; value of surgical removal of localized lymphomas, 289; lymphography in venous diseases of lower extremity, 397; diagnostic value of lymphangiography, 404; experimental microlymphangiography, 498; lymphosarcoma in childhood, 498; microlymphangiographic studies of experimental skin homografts, 531; microlymphangiographic studies of experimental skin autografts, 531

Mediastinum, Transsomatic vertebral phlebography in diagnosis of disease of, 99; principle and technique of air mediastinography, 99; prevertebral retromediastinal space, 138; hydatid cysts of, 139; clinical importance of variants of origin of innominate artery in man during operations on neck and anterior, 437; herniation of, after lung resection in children, 452; bronchogenic cysts of, 539

Melanoma, Studies on, 448; on malignant, 448

Meninges, Meningocele sacralis ventralis, 126; cystic formation of coverings of spinal cord, 232; purulent meningitis of newborn infants, 529

Mesentery, Chylous cysts of, in infants, 142; developmental cysts of, 460
Metabolism, Diagnosis and treatment of postoperative disturbance of, 92; disorders of, in gastrointestinal disease, 463; changes in, in normal pregnancy and delivery, 474
Mitral valve, Transventricular commissurotomy of, 40; transventricular mitral valvulotomy under controlled hypotension, 40; results of 348 commissurotomies for stenosis of, 40; reoperation for stenosis of, 40; open heart surgery for regurgitation and stenosis of, 136; atresia of, 354; roentgen evaluation of pulmonary arterial pressure in stenosis of, 403; evaluation of surgical correction of regurgitation of, 453; surgical treatment of insufficiency of, and combined stenosis and insufficiency of, with use of heart-lung machine, 573
Mortality, Quality of human semen in relation to perinatal, 70; perinatal, with 12,000 births, 71; biologic immaturity in study of fetoneonatal physiopathology, 71; study of 183 road deaths in and around Birmingham in 1960, 585
Mouth, Diagnostic and prognostic value of oral smears in radiotherapy of carcinoma of oral cavity and oropharynx, 116; distant metastasis of oral carcinoma, 339
Mucormycosis, In severely burned patients, 500
Muscles, Pectoralis major, 88; eye in dystrophia myotonica, 114; anterior tibial syndrome, 129; tumors of smooth, of esophagus; collective review, 205; variations in action of anterior tibial muscle and their clinical significance, 394; skeletal shape and muscle power, 485; rhabdomyosarcoma of skeletal, 565
Myasthenia gravis, Preparation for and results of surgery in, 140

Neck, Simultaneous irradiation and regional intra-arterial perfusion with nitrogen mustard for extensive cancers of head and, 305; extracranial neurogenic tumors of head and, 341; clinical importance of variants of origin of innominate artery in man during operations on anterior mediastinum and, 437; aseptic necrosis of clavicle after dissection of, 438; clinical and therapeutic study of median cysts and fistulas of, 526
Nerves, cranial, Experiences with electrocoagulation in trigeminal neuralgia, 28; two stage intracranial and orbital operation for glioma of optic nerve, 28; facial nerve grafting, 125; trigeminal neuralgia, 229; surgical approach to tympanic portion of facial nerve, 230; use of nerve grafts for repair of defects in facial nerve, 230; extracranial neurogenic tumors of head and neck, 341; infrequent modification of morphology of optic chiasm and optic nerve in hypophysial tumors, 529
Nerves, peripheral, Microfilter sheaths in surgery of; laboratory report and preliminary clinical study, 232; examination of sensory loss by ninhydrin printing test in Volkmann's contracture, 445; 2 cases of paralysis of peroneal nerve due to ischemia, 445; stress-strain phenomena in trunks of human, in human spinal nerve roots, and in denervated trunks of, 446; injury of median ulnar nerves, 530
Nerves, sympathetic, Supraventricular tachycardias, 29; extent and permanence of denervation produced by lumbar sympathectomy, 29; 10 year status after sympathectomy for arteriosclerosis, 30; long term results of transthoracic extramucosal cardioesophagotomy with resection of left splanchnic and dorsal sympathetic chains in treatment of megaesophagus, 42; endoscopic thoracic sympathectomy, 127; neuroblastoma; review of 28 cases and presentation of 2 cases with metastases and long survival, 127; value of sympathetic and suprarenal surgery in severe arterial hypertension, 530
Nervous system, In hypothermia, 191; anticoagulants in neurosurgery, 341; spinal cord tumor—cause of progressive neurologic changes in children with scoliosis, 386; anesthesia with sodium 4-hydroxybutyrate in 220 neurosurgical cases, 505; histologic study of lesions of large nerve trunks in spontaneous arterial occlusions, 509
Nervous system, central, Alterations in area of anterior clinoid processes due to expansively growing tumors, 226; operative findings in basilar impression and associated malformations of atlanto-occipital region, 228
Nevi, Dissenting view on prophylactic removal of plantar and palmar, 129
Newborn, Concerning cesarean section for suspected erythroblastosis of, 67; corticotherapy in Rh-immunized pregnant women and value of exchange transfusion in, 70; biologic immaturity in study of fetoneonatal physiopathology, 71; acute chloramphenicol poisoning in, 71; effect of antibacterial nasal cream on nasal colonization and infection in, 71; diagnosis and therapy of congenital diaphragmatic defects and hiatus hernia in young infants and, 72; new results of studies on effect of respiratory stimulants in, 166; imperforate anus from a roentgenologic viewpoint, 166; clinicostatistical study on treatment and prophylaxis of hemolytic disease of, due to Rh factor, 268; problem of neonatal umbilicus and its relation to incidence of sepsis in a maternity unit, 268; roentgen signs of pneumoperitoneum in, 270; imperforate vagina in, 270; umbilical artery aplasia, 376; anesthesia in infants, young children, and, 478; diagnosis of chromosome abnormalities in, by use of umbilical cord blood cultures, 478; purulent meningitis of, 529; erythrocyte survival in, as measured by chromium 51 and its relation to postnatal serum bilirubin level, 551; brain damage in, due to birth trauma, 551; study of vulvovaginal smears in premature, 552
Norethynodrel, Effect of, on endometriosis, 549
Nose, Comparative advantages of frontal flaps and of nasogenal flaps in reconstruction of, 32; end-to-side anastomosis for obstruction of nasolacrimal duct, 221; nasopharyngeal cancer, 300; congenital dermoid cysts and fistulas of, 337
Nylon, Effect of human tissues on tensile strength of implanted sutures of, 585

Obstetrics, Placental permeability and pharmacologic activity of thiopental sodium in anesthesia for, 98; cardiac arrest in, 162; use of oxytocin and vasopressin in gynecology and, 164; fluoromar anesthesia in, 193; usefulness of paracervical block in, 374
Oddi's sphincter, Concerning certain lesions of, and their sequelae, 154
Os calcis, Reconstruction-arthrodesis for fractures of, 492
Osteomyelitis, Some problems in diagnosis and treatment of acute, 386; treatment of, 562
Ovary, Carcinoma of, 62; late results after combined surgical and radiant treatment of tumors of, 160; medullary resection of, in treatment of Stein-Leventhal syndrome, 265; pseudomyxoma peritonei, 369; surface tumors of, 370; interstitial cell tumor of, with virilism detected preoperatively with help of endocrinologic methods, 473; position of maternal, in late pregnancy, 475; diagnosis of cystadenocarcinoma of, 549
Oxygen, Experimental study of consumption of, during extracorporeal circulation with aid of homologous lung oxygenator, 97; bacterial contamination of,

used in cardiopulmonary bypass, 295; effect of, on radiosensitivity, 302
Oxyphenbutazone, Clinical evaluation of, in surgical inflammatory lesions, 187
Oxytocin, Use of, and vasopressin in obstetrics and gynecology, 164

PAIN, How to manage, in malignant disease, 102; case of intractable, in head and face associated with pathologic changes in optic thalamus, 125; of low back and sciatica, 125; treatment of intractable, with morphine and tetrahydromaninacrine, 187; value of cordotomy for relief of, 342
Palate, Mixed tumors of, 118
Palate, cleft, And cleft lip in Tasmania, 21; long range evaluation of repair of, 21
Pancreas, Cysts, pseudocysts, and cystic tumors of, 57; elevated serum amylase; review and analysis of findings of 1,000 cases of perforated peptic ulcer, 155; transvisceral cyst enterostomy and cyst gastrostomy for treatment of postinflammatory pseudocysts of, 155; effect of drugs upon experimental pancreatitis in rat, 201; effect of hypothermia on experimentally induced hemorrhagic necrosis of, 201; pathologic physiology of inflammation of, 260; surgical management of injuries of, 260; morphologic and roentgenographic studies of biliary passages after section of ducts of, in dog, 303; examination of serum ferment activity in surgery of biliary tract, 364; splenic vein disease in association with cysts of, 365; accessory, in stomach and duodenum, 365; technique and utility of secretion test, 469; concerning pancreatitis, 469; modern therapy for acute hemorrhagic pancreatitis, 469; chronic inflammatory sclerosis of, 545; morphologic and secretory studies in experimentally induced pancreatitis in rats, 545; wounds of, 546; re-evaluation of serum amylase determinations, 569; carcinoma of, and its early roentgenologic recognition, 582; surgical treatment of chronic pancreatitis; evaluation of experimental pancreaticoenterostomy, 585
Panniculitis, Focal inflammation in subcutaneous fat tissue with special reference to forms of, 32
Parathyroid glands, Osteitis secondary to adenoma of, 24; hyperparathyroidism, parathyroid "adenomas," and peptic ulcer, 45; surgery of, 224; effect of parathyroidectomy on incidence of renal calculi, 224; functioning cysts of, 440; clinical experiences of lesser known manifestations of hyperparathyroidism, 440
Parkinson's disease, Respiratory disturbances in, 123
Parotid gland, Surgical treatment of tumors of, 22; clinical and experimental study of functional paralysis of facial nerve following conservative parotidectomy, 117; mixed tumors of, and their treatment, 436
Patella, Surgical repair of fractures of, 85; patella partita, 85
Penicillin, In vitro activity of various, 94; anaphylactic shock and hyperergic allergy after injection of, 94; incidence of reactions following oral administration of phenethicillin, 189; new, 500; "penbritin"; oral, with broad-spectrum activity, 572
Penis, Plastic induration of corpus cavernosa, 73; hypospadias and its treatment, 167; carcinoma of, 167; treatment of Peyronie's disease, 271; hypospadias, 272; new orientations in plastic repair of hypospadias, 554; 20 year review of 489 cases of hypospadias, 554; carcinoma of, in Jews, 554; metastatic tumors of, 555
Peritoneum, Tuberculous peritonitis, 459; acute retroperitoneal syndrome, 459; meconium peritonitis; prognostic significance, 463; subphrenic air after retropneumoperitoneum, 541
Pharynx, Experiences with flap of posterior, for correction of velopharyngeal insufficiency, 117; bilateral pharyngoplasty as an aid to velopharyngeal closure, 117; nasopharyngeal cancer, 300
Placenta, Lesions of circulatory system of, 65; hormonal diagnosis of dysfunction of, leading to fetal death, 65; present-day management of, in late abdominal pregnancy, 66; transmission of succinylcholine through, 193; experimental induction of abruption of, 267; studies of isolated perfused human, 371; localizing, with radioactive iodinated human serum albumin, 371; changes in, in early spontaneous abortion, 371; localization of, using radioiodinated serum albumin, 474; insufficiency of, 474
Plasma, Comparative studies on influence of saline and dextran on volume of, 570; use of low molecular weight dextran and serum expanders in extracorporeal circulation, 573
Poliomyelitis, Subtalar arthrodesis in, 87
Polyps, Multiple lymphomatous polyposis of gastrointestinal tract, 358; management of, of rectum and colon, 362
Portal vein, Hepatic circulation and corrective surgery for portal hypertension, 55; intrasplenic pressure as an index of pressure of, 58; elective portal systemic shunt, 151; surgical treatment of portal hypertension, 151; transthoracic ligation of celiac axis in treatment of hepatic cirrhosis and hemorrhage due to portal hypertension, 258; encephalopathy after surgical portacaval anastomosis, 258; splenoportographic characteristics of tumors of liver and upper abdomen, 258; simultaneous splenoportography and cavography for study of adenopathy and deep metastases, 259; portal hypertension, its diagnosis and treatment, 363; splenic vein disease in association with cysts of pancreas, 365; early portacaval shunt in selected cases of massive hemorrhage from esophageal varices, 467; on portacaval shunt for treatment of bleeding esophageal varices in bilharzial patients, 545; experimental vein grafting in, 568; splenovenographic appearances in portal hypertension and their correlation with portal pressures, 581; pseudo-obliteration of, in splenoportography, 581
Pregnancy, Adenomas of breast; relationship of adenofibromas to, 33; serum enzymes in normal and toxemic, 64; natural resistance to infectious diseases during; possible relationship to serum properdin concentration, 64; oxygen tension of blood in umbilical cord and intervillous space, 64; lesions of circulatory system of placenta, 65; hormonal diagnosis of placental dysfunction leading to fetal death, 65; puncture of pouch of Douglas as diagnostic aid in ectopic, 65; study of 8 cases of abdominal, 66; present-day management of placenta in late abdominal, 66; at age 40 and over, 66; uterine perforations, 67; metabolic problems in delivery of diabetic women, 67; chorionic gonadotropins in treatment of early spontaneous abortion, 68; bacteremic shock in pyelonephritis and criminal abortion, 68; cardiac malformations in rats induced by exposure of mother to carbon dioxide during, 100; incidence of anomalous development following maternal rubella, 161; anemias of, 161; effect of benzydroflumethiazide on edema of, 162; etiology of hypertension in toxemia of, 162; mechanism of Rhesus isoimmunization, 163; relation of epileptic symptoms to, 165; after cervical ring biopsy, conization, and amputation, 261; cervical cytology in, 266; pathogenesis and therapy of habitual hydramnios, 266; 18 year analysis of ectopic, 266; idiopathic jaundice of, 267; treatment of eclampsia, 267; prolapse of umbilical cord, including a late follow-up of fetal survivors, 268; problem of neonatal umbilicus and its relation to incidence of sepsis in a maternity unit, 268; detection and disposal of breast

cancer in, 347; review of 36 Shirodkar operations, 368; serum isocitric dehydrogenase in normal and abnormal, 370; clearance of radioactive sodium from myometrium of pregnant diabetic, 370; clinician's dilemma: conization for evaluation of carcinoma in situ of cervix in, 372; pre-eclampsia and eclampsia—results, 372; rupture of uterus during, 372; spontaneous premature rupture of fetal membranes, 373; spontaneous premature rupture of membranes, 373; amelioration of hypertension of toxemia by postpartum curettage, 374; subarachnoid hemorrhage and, 441; factors affecting prognosis of cancer of cervix in, 471; c-reactive protein during normal, and puerperium, 474; metabolic changes in normal, and delivery, 474; placental insufficiency, 474; subsequent obstetric performance of patients meeting historical criteria for cervical incompetence, 475; diagnostic, obstetric, and prognostic importance of "combined palpation of child and pelvis," 475; position of maternal ovaries in late, 475; plasma and blood volume changes in, complicated by pre-eclampsia, 476; etiology of ectopic, 476; spontaneous rupture of splenic vein during, 495

Prostate, Fraction of acid phosphatase versus total acid phosphatase in; reliability in diagnosis and treatment of cancer of, 73; cancer of; clinical and pathologic evaluation of patients treated by radical prostatectomy, 73; simultaneous retropubic prostatectomy and inguinal herniorrhaphy, 142; Hyrntschak prostatectomy, 167; bacteremia following retropubic prostatectomy, 271; hormonal treatment of disorders of, 271; unsuspected carcinoma in surgical specimens of, 271; considerations with reference to technique of prostatectomy, 377; lithiasis of, considered as carcinogenic factor, 377; simplified method for estimating serum acid phosphatase, 479; primary sarcoma of, 479; effect of epsilon aminocaproic acid on bleeding after prostatectomy, 479; technique of vasectomy for prevention of epididymitis after prostatectomy, 553; study of acid phosphatase of blood during treatment of carcinoma of, with sodium salt of hexestrol diphosphate via rectal administration, 553; therapy of carcinoma of, by means of rectal administration of hexestrol diphosphate, 553

Prosthesis, Use of, in treatment of cicatricial stenoses of larynx, 35; resection of malignant thymoma with replacement of superior vena cava by, 43; arterial replacement and reconstruction, 89; healing complications with plastic arterial implants, 89; report on 313 inguinal hernias repaired with nylon nets, 141; treatment of coarctation of aorta with isthmotomy and plastic reconstruction of isthmus, 181; simplified treatment of large, sacciform aortic aneurysms with patch grafts, 288; plastic, for experimental reconstruction of cervical trachea, 451; correction of aortic regurgitation using plastic valves, 454; replacement of vena cava defects, 496; bridging small artery defects in dog with in situ preformed autologous connective tissue tubes, 497; small artery replacement by autologous veins, homologous arteries, and teflon tubes in dogs, 497; studies in segmental replacement of thoracic trachea, 535

Protein, Changes in, in cerebrospinal fluid of patients with herniated nucleus pulposus, 230

Puerperium, Puerperal hematomas, 70; management of postpartum urinary retention, 175; c-reactive protein during normal pregnancy and, 474

Pylorus, Discussion of congenital stenosis of, 462

RADIATION, Chronic professional radiodermatitis of hands, 31; effects of roentgen, on adrenal cortical function in man, 79; sensitivity of hypothermic mammals to x-irradiation, 191; pretherapeutic physical experiments with high energy protons, 199; skin and subcutaneous reactions induced by supervoltage irradiation, 199; problem of over-irradiation, 200; late irradiation changes in vaginal cytology, 261; nephritis due to, in adults and children; effects of, on growing bones, 300; host factors affecting response to, in carcinoma of cervix, 301

Radiation therapy, Survival in invasive carcinoma of cervix 5 to 10 years after, 159; surgical treatment of cancer of cervix recurring after primary, 159; inguinal irradiation and lymph node excision in carcinoma of vulva, 161; of angioma of tongue, 198; value of, in management of intracranial metastases, 229; radiosensitivity testing procedures in cancer of cervix, 300; specifications of tumor dose, 301; combined high pressure oxygen and, in treatment of human cancer, 301; oxygen effect on radiosensitivity, 302; clinical experiments with electron therapy up to 30 m.e.v., 302; for osteogenic sarcoma, 387; intravascular irradiation of internal mammary lymph nodes in breast cancer, 406; role of combination chemotherapy and, 406; role of supervoltage therapy, 406; role of electron therapy in treatment of patients with cancer, 407; some consequences of pulmonary irradiation, 407; treatment of superior sulcus tumor by irradiation followed by resection, 536

Radioactivity, Treatment of cancer of bladder with radiocobalt and betatron, 78; use of P^{32} in diagnosis of ocular tumors, 114; angiographic findings before and after gamma radiation therapy (Co^{60}) of gliomas, 124; clinical experience with radioactive iodopyracet, diodrast, renogram in pediatric subjects, 169; evaluation of radioactive renogram in hypertension, 199; intracavitary radiogold therapy, 199; palliation of osseous metastases from breast carcinoma with radioactive phosphorus alone and in combination with adrenalectomy, 200; further experience with radiogold as adjunct to radium therapy in treatment of pelvic lymph nodes in cancer of cervix, 262; histologic and dosimetric considerations of bone tumor production with radioactive phosphorus, 285; intrauterine isotopes in menorrhagia, 367; clearance of radioactive sodium from myometrium of pregnant diabetic, 370; localizing the placenta with radioactive iodinated human serum albumin, 371; use of "radiopaque streamers" to show blood currents in heart, 403; radioisotope nephrogram obtained with urografin tagged with iodine 131, 408; results of treatment of malignant neoplastic disease with radioactive colloidal gold, 408; hypophysectomy and radioactive gold implants in treatment of metastatic carcinoma of breast, 443; placental localization using radioiodinated serum albumin, 474; technique, interpretation, and indications for radioisotope nephrogram, 481; treatment of breast cancer by radical mastectomy, postoperative roentgen therapy, and intravenous radiophosphorus, 508; radioactive colloidal yttrium silicate in treatment of malignant effusions, 511; radioisotope renogram, 547; erythrocyte survival in newborn infant, as measured by chromium 51 and its relation to postnatal serum bilirubin level, 551; radioactive calcium, Ca^{47}, tracer studies in patients with bone lesions, 583; system of radioiodine therapy for thyrotoxicosis and nontoxic goiter involving measurement of thyroidal radiosensitivity, 584

Rectum, Changing concepts in treatment of carcinoma of colon and, 54; occult invasive cancer in polypoid adenomas of colon and, 150; multilocular retrorectal cystic disease—cyst-hamartoma, 150; practical implications of multiple tumors of colon and, 257; management of polyps of colon and, 362; congenital

abnormalities of anus and, 362; diagnosis and surgical management of rectourethral fistulas, 467; sacral hernias after amputation of, 467; pneumostratigraphy in study of walls of perirectal spaces and, 580

Respiration, Disturbances of, in Parkinson's disease, 123; unilateral hypoventilation in man during temporary occlusion of one pulmonary artery, 236; efficiency of ventilation with various methods of controlled ventilation, 575

Respiratory Tract, Treatment of emphysema and other insufficiencies of, by tracheal fenestration, 135; investigation of upper airway problems in resuscitation, 192; tracheostomy in management of problems of, 235; elective tracheostomy in patients with insufficiency of, who are subjected to pulmonary surgery, 236

Resuscitation, Investigation of upper airway problems in, 192

Reticuloendothelial system, Effects of splenectomy on red-cell production in myelofibrosis, 185

Retina, Intravenous urea in surgery of detachment of, 433

Roentgen rays, diagnosis, Artifacts in cerebral angiography, 25; safe and simple method for percutaneous vertebral angiography, 25; combination of saccular aneurysm of pericallosal artery with anomalies of circle of Willis in carotid angiogram, 25; diagnosis of cerebral hemiatrophy and indications for hemispherectomy by, 25; radiologic changes and clinical incidence of endocrine effects in sellar and parasellar tumors, 27; importance of angiographic diagnosis in intralobar pulmonary sequestration, 36; horizontal laminagraphy: supplemental diagnostic method in tumors of lung, esophagus, and mediastinum, 36; injection of air into mediastinum in preoperative diagnosis of bronchogenic carcinoma, 43; clinical and roentgenologic aspects of duodenal diverticula, 50; practical technique for routine use of operative cholangiography, 55; transcutaneous intrahepatic cholangiography in biliary obstruction, 56; cholecystography and cholegraphy in gallstone disease, 56; nonvisualizing kidney, 75; fingertip plethysmography in head injuries, 96; angiocardiography in bullous emphysema: its role in selection of case suitable for surgery, 99; transsomatic vertebral phlebography in diagnosis of pulmonary and mediastinal disease, 99; principle and technique of air mediastinography, 99; poststenotic dilatation of ascending aorta: its occurrence and significance as roentgenologic sign of aortic stenosis, 100; value of pyelonephrotomography in diagnosis of benign and malignant tumors of kidney, 100; ventriculoatriostomy; technical note, accurate placement of distal end of shunt into right atrium without x-ray control, 124; angiographic findings before and after gamma radiation therapy (Co^{60}) of gliomas, 124; experimental cineroentgenographic study of thoracic duct, 134; x-ray pelvimetry, 163; imperforate anus from a roentgenologic viewpoint, 166; retrograde renal arteriography in course of arterial hypertension, 170; clinical study of angiographic anatomy, 181; diagnostic and therapeutic potential of lymphangiograms, 184; radiographic studies of lymphatic system, 184; identification of pathologic processes in posterior cranial fossa by myodil ventriculography, 195; transsternal internal mammary phlebography for demonstrating intrathoracic adenopathy in breast cancer, 195; intravenous abdominal aortography in treatment of abdominal aortic aneurysms, 195; complications in aortography and arteriography, 195; experiences with 710 angiograms of heart and of great vessels, 196; role of air mediastinography in differential diagnosis of cardiovascular anomalies and surgical tumors, 196; pelviography in uterine cancer, with specially prepared contrast medium, 196; adenomyomatosis of gallbladder, 197; percutaneous splenoportogram and intrasplenic adrenalin test in liver cirrhosis, 197; angiography in vascular disease of brain, 225; layering of contrast medium in intracranial aneurysms during angiography, 225; simultaneous lateral and anteroposterior cerebral angiograms, 225; complications of cerebral angiography, 225; new sign in pneumoencephalographic study of cerebellopontine angle tumors, 226; transsternal phlebography of internal mammary system for delineation of intrathoracic extension of carcinoma of breast, 234; pneumomediastinography in carcinoma of lung, 240; splenoportographic characteristics of tumors of liver and upper abdomen, 258; simultaneous splenoportography and cavography for study of adenopathy and deep metastases, 259; gynecologic celioscopy, 263; roentgen signs of pneumoperitoneum in newborn, 270; some anomalies of circle of Willis, 297; differential diagnosis of intradural extramedullary and extradural spinal canal tumors, 297; left retrograde cardioangiography: its diagnostic value in acquired and congenital heart disease, 297; evaluation of cardiovascular contrast media, 298; clinical evaluation of intravenous abdominal aortography and peripheral arteriography, 298; of fibromuscular hyperplasia of renal arteries, 298; comparative trial of telepaque and biloptin, 299; biloptin and solubiloptin, 299; gynecography, 299; pneumoencephalographic appearance of cisterns in posterior fossa tumors, 341; reliability of, of breast cancer, 347; roentgenologic aspects of chronic cor pulmonale, 350; limitations of present techniques in precise diagnosis of interatrial septal defects and description of experimental method of visualization, 352; new approaches to coronary arteriography, 353; roentgenographic findings in cases of gastric biliary calculi, 363; vertebral arteriography by retrograde injection of right common carotid artery, 395; false block of internal carotid artery during angiography, 395; roentgen evaluation of pulmonary arterial pressure in mitral stenosis, 403; re-evaluation of translumbar aortography, 403; automatic electrocardiographically timed coronary angiography, 403; venoangiography, 404; diagnostic value of lymphangiography, 404; differential "nephropacification": screening procedure for unilateral renal artery occlusion, 404; cystography in bladder tumors, 404; evaluation of new cholecystographic agent, 404; cerebral angiography, 441; angiography in head injuries, 441; radiologic localization of esophageal hiatus as determined by intraluminal pressure measurements, 456; use of gynecography in pelvic diagnosis, 471; diagnostic value of routine hysterography in cases of metrorrhagia, 471; technique, interpretation, and indications for radioisotope nephrogram, 481; serial renal vasography as fundamental diagnostic method in renal surgery, 481; experimental microlymphangiography, 498; angiocardiography, 504; percutaneous transhepatic cholangiography, 507; radiologic findings and prognosis in ulcerative colitis, 507; association of pneumoperitoneum of pelvis with pneumoexoperitoneum in vesical parietography, 507; pneumopelviography in endocrinologic clinic, 508; angiography of temporal arachnoid cysts, 527; cerebral angiography in diagnosis of suprasellar tumors, 527; roentgenologic features of neurofibromas involving gasserian ganglion, 527; indications and technique of iodoventriculography, 527; diagnosis of cervical tumors by gamma myelography and vertebral arteriography, 529; improved method in diagnostic roentgenography of

breast, 533; contrast examinations of cardiovascular system during increased intrabronchial pressure 538; subphrenic air after retropneumoperitoneum, 541; tubal insufflation and hysterosalpingography, 547; limits of visibility in unidirectional and pluridirectional stratigraphy, 577; technique of intravenous carotid and vertebral arteriography, 577; utility of stratigraphy associated with pneumopyelography, 577; arthrographic diagnosis of discoid meniscus, 578; low viscosity contrast media for cardiovascular visualization, 578; experience with major arterial visualization employing right heart or superior vena cava injection, 578; mesenteric arteriography, 579; examination of patients with suspected perforated ulcer using water-soluble contrast medium, 580; barium studies in aged, 580; roentgenologic features of carcinoma in chronic ulcerative colitis, 580; pneumostratigraphy in study of walls of rectum and of perirectal spaces, 580; splenovenographic appearances in portal hypertension and their co-relation with portal pressures, 581; pseudo-obliteration of portal vein in splenoportography, 581; preoperative cholangiography, 581; pancreatic carcinoma and its early roentgenologic recognition, 582; new technique for hepatic phlebography, 582; significance of phlebography in modern treatment of varicose veins, 583

Roentgen rays, therapy, Combined treatment of carcinoma of cervix with full, followed by radical pelvic operation, 61; diagnostic and prognostic value of oral smears in radiotherapy of carcinoma of oral cavity and oropharynx, 116; incidence of pelvic malignancies following, for benign gynecologic conditions, 157; current treatment of intussusception, 197; of malignant melanoma of eye, 198; effects of combined chemotherapy and, on transplanted tumors in mice, 204; place of, in treatment of cancer of larynx, 436; results of, in undifferentiated carcinoma of thyroid, 439; delayed radionecrosis of brain following, of pituitary, 443; rectal and bladder injuries in relation to radiation dosage in carcinoma of cervix, 472; treatment of breast cancer by radical mastectomy, intravenous radiophosphorus, and postoperative, 508; of Wilms's tumor, 583; for bronchial tumors, 583

Salivary glands, Adenolymphoma, papillary cystadenoma lymphomatosum, 118; mixed tumors of, and their possible endocrine effects, 118; surgical management of tumors of, 223; surgical correction of fistula of, 223; tuberculosis of, 436

Sarcoma, Lymphosarcoma of stomach, 51; of gastrointestinal tract, 52; reticulum cell, complicating atopic dermatitis, 203; clinical observations and statistical evaluation of 780 sarcomas, 203; smooth muscle tumors of esophagus; collective review, 205; of larynx, 223; at New York Hospital, 233; primary, of stomach, 249; Ewing's, 286; embryonal rhabdomyosarcoma, 344; rhabdomyosarcomas in childhood, 344; of bone complicating Paget's disease, 387; radiotherapy for osteogenic, 387; orbital reticulum cell, 433; primary lymphosarcoma of thyroid, 439; soft tissue fibrosarcoma, 447; liposarcoma of extremities, 447; primary prostatic, 479; lymphosarcoma in childhood, 498; immunochemical differentiation of rhabdomyosarcomas, 509; synovial, 563; rhabdomyosarcoma, 564; rhabdomyosarcoma of skeletal muscle, 565

Shock, "Irreversible", following surgical operation in man, 92; treatment of, in burned child, 93; evaluation of pressor, cardiac, and renal hemodynamic properties of angiotensin II in man, 187; levophed by intramuscular route, 188; studies of coronary and peripheral blood flow following hemorrhagic, and after treatment with transfusion, and 1-norepinephrine, 287; intravenous administration of cortisone in states of, 291; treatment of cardiovascular collapse with synthetic hypertensin II, 399; comparative studies on influence of saline and dextran on plasma volume, 570; drug treatment of hemorrhagic, 586

Shoulder, Calcific tendinitis of, 278; anatomic study of senile, 487

Sigmoid, Some clinicodiagnostic aspects of endometriosis of, 544

Sinuses, Surgery of extensive cancer of paranasal, 116; pneumocephalos occurring with osteomas of paranasal, 123

Skin, Reticulum cell sarcoma complicating atopic dermatitis, 203; diagnosis and treatment of malignant surface tumors, 233; necrosis of, as a result of perfusion with noradrenaline, 291; surgical treatment of keloids, 343; ultrastructure of collagen in scars, keloids, and, 448; psoriasis carcinoma, 448; ivalon surgical sponge used as temporary cover of experimental defects in, in rats, 531; grafts of, in relation to regional function, 532; grafting of, in traumatic lesions of hand, 533; healing of defects in immobile, in rabbits, 533

Skull, Chronic osteomyelitis of base of, 28; plastic repair of defects in, with deep-frozen, homogenous, cranial bone, 227

Snake bite, Treatment of, by isolation perfusion technique, 188; incision and suction following injection of rattlesnake venom, 189

Sodium, In bone in surgical operations and disease, 101

Spinal cord, Morbid anatomy of cervical spondylosis and myelopathy, 29; pathogenesis and management of spinal myelomeningocele, 29; tumors of spinal canal in children, 29; low back pain and sciatica, 125; importance of cervical myelography in cervical and upper thoracic nerve root avulsion, 126; further observations on Lissauer tractolysis, 126; surgical treatment of metastatic epidural tumors, 126; tumors of, 127; tumors of, in infants, 231; treatment of fractures and dislocations of cervical spine complicated by cervical cord and root injuries, 231; chronic rheumatoid polyarthritis and spondylarthritis associated with neurologic symptoms and signs occasionally simulating an intraspinal expansive process, 231; experience with 262 laminectomies, 231; surgical treatment of lumbar root compression, 231; cystic formations of coverings of, 232; value of cordotomy for relief of pain, 342; chronic infection of urinary tract among patients with injury of, 381; tumor of; cause of progressive neurologic changes in children with scoliosis, 386; neurologic manifestations of nontraumatic atlanto-axial dislocations, 444; Pott's paraplegia treated by anterolateral decompression, 444; vertebral artery insufficiency in acute and chronic spinal trauma, 445; preoperative and postoperative course in 30 cases of nontraumatic compression of, 529; intermittent claudication of cauda equina, 529; diagnosis of cervical tumors by gamma myelography and vertebral arteriography, 529

Spine, Clinical significance of sinuvertebral nerve of cervical, in relation to cervical disc syndrome, 28; morbid anatomy of cervical spondylosis and myelopathy, 29; operative treatment of spina bifida occulta in presence of late symptoms in lower limbs, 126; idiopathic scoliosis during adolescence and childhood, 178; direct approach to, in treatment of scoliosis, 178; diagnostic significance of low back and sciatic pain after disc operations, 179; discographic contributions to study of pathophysiology of intervertebral disc, 230; herniated nucleus pulposus and constitutional type of spinal column, 230; thoracic intervertebral disc protrusions, 230; protein changes in

cerebrospinal fluid of patients with herniated nucleus pulposus, 230; treatment of fractures and dislocations of cervical, complicated by cervical cord and root injuries, 231; cancer metastases in cervical vertebrae, 276; developmental origin of spondylolisthesis, 276; results of fusion in scoliosis, 276; radiographically demonstrable thickening of bone in spinous processes of lumbar, 277; analysis of 1,176 operated cases of herniated lumbar intervertebral discs, 277; role of trunk in stability of, 277; fractures of transverse apophysis of lumbar vertebrae, 277; vascular complications from disc operations, 278; thrombophlebitis as a complication of conservative management of herniated lumbar intervertebral discs, 289; differential diagnosis of intradural or extramedullary and extradural tumors of canal of, 297; radiation nephritis in adults and children; effects of radiation on growing bones, 300; follow-up of surgically treated herniated nucleus pulposus, 342; stabilization of collapsing, 390; major vascular complications of lumbar disc surgery, 444; surgical treatment of cervical spondylotic myelopathy, 445; treatment of sciatic syndrome by injection, 445; origins of spondylolisthesis, 485; surgical treatment of vertebral tuberculosis, 485; surgical treatment of vertebral tuberculosis: direct extirpation of focus, 486; sacrococcygeal chordomas—therapeutic problems, 530; changes in cervical, of adolescents, 559

Spleen, Resection of cardia for bleeding after excision of, 47; intrasplenic pressure as an index of portal venous pressure, 58; arteriovenous fistulas of pedicle of, 58; traumatic rupture of, 155; trauma of, 156; effects of splenectomy on red-cell production in myelofibrosis, 185; peritoneal splenosis, 366; rupture of, by blunt trauma, 470; traumatic rupture of normal, 546

Staphylococcus, Epidemiology of, on surgical ward, 94; septicemia due to colonization of Spitz-Holter valves by, 228; detection of outbreak of infection of perineal tears due to, by routine phage typing, 269; infection of newborn in hospital and domiciliary practice, 376; susceptibility of antibiotic-resistant, to heterologous antibiotics, 501; investigations on the occurrence and distribution of, 572

Sterility, Acute appendicitis with subsequent, 477

Sternum, Fractures of, 35

Steroids, Corticosteroids in treatment of nonpatent fallopian tubes, 62; aldosteronic treatment of adrenalectomized patients, 80; effects of treatment with, on patients undergoing operation, 291; blood corticosteroid levels in mastopathy and breast cancer after ACTH administration, 348; physiologic considerations in management of patients with corticosteroid-induced adrenal suppression who undergo operation, 399

Stomach, Effects of intracranial disease on secretion of, 27; experience with 3,000 cases of esophageal and cardial carcinoma, 41; healed experimental gastric ulcer in rat; reulceration resulting from cortisone administration, 45; ulcer of, 45; study of gastric secretory pattern in surgery of gastric and duodenal ulcer, 48; cancer of, 49; perforated cancer of, 49; operation for carcinoma of, 49; leiomyoma of, 51; lymphosarcoma of, 51; antral gastritis, 142; control of function of, after subtotal gastrectomy, 143; clinical study of 5 year survivors after surgery for carcinoma of, 143; hemorrhage from gastritis, 247; benign tumors of, 247; carcinoma of, 248; pathology and prognosis of carcinoma of, 248; malignant lesions of, in Hawaii; experiences with 350 patients, 249; primary sarcoma of, 249; postoperative gastric aspiration by temporary gastrostomy, 252; benign tumors of, 298; carcinoid tumors of, 358; experiences with a Billroth I reconstruction following vagotomy and antrectomy for duodenal ulcer, 359; roentgenographic findings in cases of gastric biliary calculi, 363; accessory pancreas in duodenum and, 365; secretory background to ulcer of, 461; pernicious anemia and cancer of, in England and Wales, 462; effect of medical and surgical vagotomy on augmented histamine test in man, 462; carcinoma of, following gastroenterostomy and partial gastrectomy, 462; histologic background to ulcer of, 542; exfoliative cytology in tumors of, 542; healing of experimental ulcers of, 543; tetracycline fluorescence in diagnosis of carcinoma of, 543

Surgery, Prevention and treatment of thrombosis, 91; treatment of respiratory insufficiency by means of artificial ventilation during postoperative period, 92; diagnosis and treatment of postoperative disturbance of metabolism, 92; "irreversible" shock following, in man, 92; complications of wounds of, 93; use of toxiferine for production of relaxation for, 98; bone sodium in disease and, 101; experimental and clinical investigation of new hemostatic absorbable gauze, 186; evaluation of pressor, cardiac, and renal hemodynamic properties of angiotensin II in man, 187; clinical evaluation of oxyphenbutazone in surgical inflammatory lesions, 187; method of regulating postoperative gastrointestinal electrolyte decompression losses, utilizing an improved watertight gastrostomy on controlled backpressure drainage, 187; experiences with wire closure of lumbodorsal incisions and investigation of tissue reaction from thermal effects of diathermy, 189; problems related to prone position for, 192; effects of steroid treatment on patients undergoing, 291; pulmonary evaluation and risk in patient preparation for anesthesia and, 291; influence of arteriosclerotic heart disease on risk of, 292; ascorbic acid economy in patients undergoing, 292; expired carbon dioxide as continuous guide of pulmonary and circulatory systems during anesthesia and, 296; hypothermia; collective review, 307; physiologic considerations in management of patients with corticosteroid-induced adrenal suppression who undergo, 399; postoperative sepsis, 400; use of intramuscular perphenazine to control postoperative vomiting, 499; experiences with hypnosis on surgical service, 499; pulmonary embolism, 499; management of pulmonary complications of surgical operations, primarily atelectasis, with pancreatic dornase inhalations, 499; sterilization with ethylene oxide with special reference to use of synthetic materials, 501; efficiency of masks in use in hospital wards, 501; ataraxic drugs in preanesthetic medication, 504; problems caused by rauwolfia drugs during anesthesia and, 505; injuries of bladder, 549; injuries to ureter during, 557; on new method for evaluation of risk of, 569; perphenazine as prophylactic antiemetic in, 569; infection of surgical wounds with Clostridium welchii, 572; effect of human tissues on tensile strength of implanted nylon sutures, 585

Surgery, plastic, Total reconstruction of external auricle, 20; new procedure for reconstruction of thumb, 32; comparative advantages of frontal flaps and of nasogenal flaps in reconstruction of nose, 32; experiences with posterior pharyngeal flap for correction of velopharyngeal insufficiency, 117; bilateral pharyngoplasty as an aid to velopharyngeal closure, 117; exposure in free split-thickness skin grafts, 130; use of molded splint to prevent contracture after skin grafting on neck, 130; corrections of deformities of middle part of face, 221; cosmetic repair for retrusion of mandible, 222; treatment of palpebral bags, 346; variations of arterial, venous, and capillary circulation of soft tissues of head by decades as demon-

strated by methyl methacrolate injection technique, and their application to construction of flaps and pedicles, 346; motor function in Abbe flaps, 346; multiple decubitus ulcer treatment by hip disarticulation and soft tissue flaps from lower limbs, 447; surgical treatment of syndactylia of hand, 449; empirical approach to mammoplasties, 449; clinical experiences with vermilion bordered lip flap, 532

Syndactylia, Treatment of, by means of "inlay" grafts, 532; surgical, of toes, 561

Synovium, Diagnosis, clinical picture, and treatment of synovioma, 563; synovial sarcoma, 563

TELEVISION, Medical applications of x-ray, 198

Temporal bone, Primary cholesteatoma of, 113

Tendon, Reconstruction of collateral and cruciate ligaments employing frozen heterologous, 179; light and electron optical study of regenerating, 180; fate of autogenous grafts of digital flexor, 180; heparin treatment of peritenomyosis (peritendinitis) crepitans acuta, 286; repair of flexor, in hand; collective review, 411; immediate repair of flexor, 493; transplantation of, through preformed gliding channels, 565; transfers of, for radial palsy, 565; results of grafting of, for injuries to flexor, in fingers and thumb after long delay, 566

Test, Examination of sensory loss by ninhydrin printing, in Volkmann's contracture, 445; technique and utility of secretion, 469; interstitial cell tumor of ovary with virilism detected preoperatively with help of endocrinologic methods, 473; serum creatinine and endogenous creatinine clearance as renal function, 481; use of an environmental temperature vasomotor, in evaluation of peripheral arterial disease, 496

Testis, Analytical survey on 178 tumors of, 74; tumors of, 74; familial type of undescended, and its malignant degeneration, 168; malignant tumors of, 168; correlation between biopsy of, and sperm count, 377; management of choriocarcinoma and related tumors of uterus and, 472; structure of, and regulation of its function, 480; observations on 3 cases of neonatal torsion of, 551

Tetanus, Incidence of reactions following administration of antitoxin against, 294; management of, 400

Thalamus, Case of intractable pain in hand and face associated with pathologic changes in optic, 125

Thorax, Malignant lesions of chest wall, 133; diagnosis and operative therapy of tumors of wall of, 133; penetrating wounds of chest, 133; experimental cineroentgenographic study of thoracic duct, 134; incidence of cardiac arrhythmias following noncardiac surgery of, 136; crushed chest, 235; operative treatment of congenital deformities of chest, 349; Mondor's disease—superficial phlebitis of chest wall, 349; management of tumors of parietes of, 349; treatment of superior sulcus tumor by irradiation followed by resection, 536

Thrombophlebitis, As a complication of conservative management of herniated lumbar intervertebral discs, 289; coagulation and thromboembolic complications among 234 burned patients, 400

Thrombosis, Prevention and treatment of, 91; of subclavian vein associated with fractures of clavicle, 279; venous, and pulmonary embolism, 495; and thrombolysis; collective review, 513

Thumb, New procedure for reconstruction of, 32

Thymus, Resection of malignant thymoma with prosthetic replacement of superior vena cava, 43; preparation for and results of surgery in myasthenia gravis, 140; tumors of, 355; surgery of, 540

Thyroid gland, Drill biopsy of, 22; tracheotomy in operations upon, 23; differences between childhood and adult carcinoma of, 23; explanation for varying incidence of carcinoma of, in surgically removed nodular thyroids, 23; intrathoracic goiter, 42; struma lymphomatosa, Hashimoto's thyroiditis, 119; malignant tumors of, 119; modified neck dissection for carcinoma of, 120; breast cancer and disease of, 131; recurrent goiter, 223; function of, in presence of breast cancer, 233; carcinoma of, 339; cord movements after thyroidectomy, 340; age and carcinoma of, 438; malignant disease of, 438; carcinoma of, 438; carcinoma in nontoxic nodular goiter, 439; results of x-ray treatment in undifferentiated carcinoma of, 439; primary lymphosarcoma of, 439; influence of age in recurrence of colloid goiter after strumectomy, 439; paralysis of vocal cords after thyroidectomy, 439; incidence and etiology of carcinoma of, 525; system of radioiodine therapy for thyrotoxicosis and nontoxic goiter involving measurement of radiosensitivity of, 584

Tibia, Arterial changes in experimental fractures of monkey's, treated with intramedullary nailing, 285; fractures of plateau of, 491

Tissue preservation, Hypothermia; collective review, 307; preservation of living tissue in frozen state, 503

Toes, Transmetatarsal amputations and arterial surgery in diabetic patients, 178; hallux valgus in adolescents, 394; indications for and results of Girdlestone-Spooner operation, 493; surgical syndactylia of, 561

Tongue, Surgical management of advanced cancer of, 22; radiation therapy of angioma of, 198; lymphangiomas of, 338; epithelioma of, 435; treatment of cancer of floor of mouth and, 525

Tonsil, Aspiration treatment of peritonsillar abscess, 22; tonsillectomy and adenoidectomy, 435

Trachea, Tracheotomy in operations upon thyroid gland, 23; cylindroma (adenoid-cystic carcinoma) of larynx and, 24; observations on cytology of tracheobronchial secretions collected by new technique, 134; experience in treatment of emphysema and other respiratory insufficiencies by fenestration of, 135; tracheostomy in management of respiratory problems, 235; elective tracheostomy in patients with respiratory insufficiency who are subjected to pulmonary surgery, 236; plastic prosthesis for experimental reconstruction of cervical, 451; studies in segmental replacement of thoracic, 535

Transplants, Homovital transplantation of heart, 41; exenteration of orbit and repair by transplantation of temporalis muscle, 115; blood supply of jejunum functioning as artificial esophagus, 139; renal homotransplantation, 172; homotransplantation of kidney in man, 172; treatment of coarctation of aorta with isthmotomy and plastic reconstruction of isthmus, 181; substitution of urinary bladder with free gallbladder autograft, 204; comparison of autologous and homologous bone grafts for cranioplasty, 221; of osteogenic tissue, 386; experimental observations on normothermic and hypothermic pulmonary, 410; replacement of vena cava defects, 496; current concepts of storage of bone marrow, 511; biologic basis and clinical application of bone marrow, 512; role of ureter in renal transplantation, 557

Trauma, Vertigo after, 27; to abdominal organs, 45; anticholinergic treatment of severe hidden cerebral, 122; primary pneumocephalos due to, 123; importance of cervical myelography in cervical and upper thoracic nerve root avulsion, 126; penetrating wounds of chest, 133; rupture of spleen due to, 155; splenic, 156; injuries of vena cava caused by external, 183; cranioencephalic injuries caused by motor scooters, 228; urea in management of head, 228; crushed chest, 235; penetrating wounds of heart, 241; duodenal; analysis of 86 cases, 250; treatment

of injuries of colon, 255; acute arterial injuries due to blunt, 288; grease-gun injuries of hand, 345; rupture of thoracic aorta due to nonpenetrating, 353; 10 years' experience with penetrating injuries of heart, 354; blunt abdominal, 357; injuries of articular disc at wrist, 390; angiography in head injuries, 441; electrocardiographic changes in head, 442; alterations in acid base equilibrium in craniocerebral, 442; vertebral artery insufficiency in acute and chronic spinal, 445; blunt abdominal, 459; closed abdominal, 460; changing concepts of treatment of injuries of colon, 464; rupture of spleen by blunt, 470; injuries of ureter due to external violence, 482; intracerebral hematoma due to, 528; skin grafting in lesions of hand due to, 533; bronchobiliary fistulas due to, 536; wounds of pancreas, 546; rupture of normal spleen due to, 546; brain damage in newborn due to birth, 551; clinical manifestations and therapy of renal, 556; study of 183 road deaths in and around Birmingham in 1960, 585

Tuberculosis, Organ-preserving surgery in urogenital, 76; of hips in adults, 83; results of conservative treatment of, of knee, 84; synovectomy in treatment of, of knee, 84; conservative surgery in renal, 273; use of 1314 TH in urinary tract, 382; of salivary glands, 436; Pott's paraplegia treated by anterolateral decompression, 444; tuberculous peritonitis, 459; advantages of center for treatment of genitourinary, 482; surgical treatment of vertebral, 485; surgical treatment of vertebral; direct extirpation of focus, 486; epididymitis due to, 555

Tuberculosis, pulmonary, Round foci and tuberculomas of lung, 37; resection in treatment of, 38; surgical treatment of, associated with anthracosis and silicosis in coal miners, 135; resectional therapy for, at Sunmount, 1950–1957, 807 cases, 239; results of subcostal plombage in, with a consideration of changing indications, 239; pulmonary resection for, in children, 451

Tumors, Surgical treatment of parotid, 22; early recognition and surgical treatment of midbrain, 26; primary intraventricular, 27; of hand, 31; adenomas of breast: relationship of adenofibromas to pregnancy and lactation, 33; pituitary adenoma and peptic ulcer disease, 46; endocrine adenomas and peptic ulcer, with special reference to pancreatic adenomas, 47; malignant connective tissue neoplasms of duodenum, 51; leiomyoma of stomach, 51; lymphosarcoma of stomach, 51; choriocarcinoma, 59; benign cervical, 59; analytical survey on 178 testicular, 74; of testis, 74; malignant renal in infancy, 76; primary ureteral, 76; plasmacytoma, 82; giant cell, of bone (osteoclastoma), 82; primary cholesteatoma of temporal bone, 113; use of P^{32} in diagnosis of ocular, 114; adenolymphoma, papillary cystadenoma lymphomatosum, 118; mixed, of salivary glands and their possible endocrine effects, 118; mixed, of palate, 118; structure of carotid body, 119; malignant, of thyroid gland, 119; cervical aneurysms and, 119; diagnosis of tuberculomas of brain, 123; intracranial epidermoids, 124; apoplexy associated with brain, 124; spinal cord, 127; review of 28 cases of neuroblastoma, 127; malignant lesions of chest wall, 133; anatomopathologic study of prescalene lymph nodes in 71 subjects with various forms of epithelial malignant, 134; ulcerogenic, of duodenum, 144; malignant, of small intestine, 147; late results after combined surgical and radiant treatment of ovarian, 160; malignant, of testis, 168; clinical manifestations and cytology of hypernephromas, 171; some aspects in classification and treatment of bladder, 174; paroxysmal and persistent hypertension as result of pheochromocytoma, 175; radiotherapy of malignant melanoma of eye, 198; radiation therapy of angioma of tongue, 198; advantages, indications, and results of therapy of malignant, with cobalt radiation, 199; surgical management of salivary gland, 223; fibrinolysin determinations in differential diagnosis of brain, 226; new sign in pneumoencephalographic study of cerebellopontine angle, 226; prognosis of medulloblastoma in children, 227; diagnosis of cerebellar hemangioblastomas, 227; spinal cord, in infants, 231; diagnosis and treatment of malignant surface, 233; benign stomach, 247; diagnosis of pheochromocytoma, 274; clinical and morphologic observations on 19 cases of plasmacytoma, 286; value of surgical removal of localized lymphomas, 289; differential diagnosis of intradural extramedullary and extradural spinal canal, 297; benign gastric, 298; multiple primary malignant neoplasms, 305; immediate reconstruction of mandible in surgery of, 338; lymphangiomas of tongue, 338; carotid body, 339; craniopharyngiomas, 341; neoplasms originating from pericytes, 343; of glomus in children, 343; hemangiomas in infants and children, 344; fibrous xanthoma and histiocytoma in children, 345; management of, of thoracic parietes, 349; of thymus, 355; retroperitoneal, in infants and children, 357; of small bowel, 361; surface, of ovary, 370; primary, of renal pelvis and ureter, 379; cystometry during and cystography after transurethral resection of bladder, 384; osteoporosis in plasmacytoma, 387; cystography in bladder, 404; results of treatment of malignant neoplastic disease with radioactive colloidal gold, 408; histogenesis of orbital endotheliomas, 433; pigmented, of eye, 434; mixed, of parotid and their treatment, 436; malignant carotid body, 437; surgical treatment of primary malignant lymphoma of lung, 452; intracardiac myxomas with report of 2 unusual cases and successful removal, 456; cysts and benign, of esophagus, 456; management of choriocarcinoma and related, of uterus and testis, 472; bilateral nephroblastoma, 481; Wilms's, 482; problems in surgical treatment of pheochromocytoma, 484; neuroblastoma presenting as ecchymosis of eyelids, 525; cerebral angiography in diagnosis of suprasellar, 527; roentgenologic features of neurofibromas involving gasserian ganglion, 527; diagnosis of cervical, by gamma myelography and vertebral arteriography, 529; sacrococcygeal chordomas—therapeutic problems, 530; arising from blood vessels in hands and feet, 532; metastasizing bronchial adenoma with atypical carcinoid syndrome, 536; exfoliative cytology in gastric, 542; diagnosis of cystadenocarcinoma of ovary, 549; metastatic penile, 555; mortality from primary bone, in England and Wales, 562; diagnosis, clinical picture, and treatment of synovioma, 563; roentgenotherapy for bronchial, 583

Ulcer, Healed experimental gastric, in rat; reulceration resulting from cortisone administration, 45; gastric, 45; hyperparathyroidism, parathyroid "adenomas," and peptic, 45; pituitary adenoma and peptic, 46; adrenal glands and peptic, 46; endocrine adenomas and peptic, with special reference to pancreatic adenomas, 47; subtotal gastrectomy for bleeding peptic, 48; study of gastric secretory pattern in surgery of gastric and duodenal, 48; symptoms and signs in prognosis of gastroduodenal, 143; partial gastrectomy for duodenal, 144; giant, or walled-off perforation of duodenum, 144; elevated serum amylase; review and analysis of findings of 1,000 cases of perforated peptic, 155; comparison of surgical treatments of duodenal, 250; partial gastrectomy for chronic duodenal, with hemorrhage, 250; hemi-

gastrectomy and vagotomy in treatment of duodenal, 251; vagotomy, pyloroplasty, and suture—safe and effective remedy for duodenal, that bleeds, 251; gastroduodenal perforation; report of 120 cases over 5½ year period with consideration of role of primary gastrectomy, 251; factors influencing mortality in bleeding peptic, 252; chronic ulceration and carcinoma, 343; experiences with a Billroth I reconstruction following vagotomy and antrectomy for duodenal, 359; secretory background to gastric, 461; perforated peptic, 461; unrecognized sign of gastroduodenal perforation, 463; histologic background to gastric, 542; healing of experimental gastric, 543; simple benign prepyloric, 579; examination of patients with suspected perforated, using water-soluble contrast medium, 580; treatment of multiple, by hip disarticulation and soft tissue flaps from lower limbs, 447

Ultrasonics, Critiqué of time-amplitude ultrasonography, 114; in diagnosis of intracranial space-occupying lesions, 442

Urea, Clinical use of, for reduction of intraocular pressure, 114; in intracranial surgery, 122; in management of head injuries, 228; intravenous hypertonic, in management of acute angle-closure glaucoma, 337; intravenous, in retinal detachment surgery, 433

Ureter, Primary tumors of, 76; reimplantation of, and bladder neck reconstruction, 78; diagnosis of malignancy of kidney, renal pelvis, and, 171; anterior nephroureterectomy; advantages and limitations of single incision, 171; retroperitoneal fibrosis producing obstruction of, 173; effect of chronic mechanical obstruction on peristalsis of, 173; stenosing idiopathic periureteritis, 175; reduction of colonic mucosal absorption with reference to chemical imbalance of ureterocolostomy, 304; primary tumors of renal pelvis and, 379; ureteroceles in infants and children, 382; classification of ureteroceles in children, 383; injuries of, due to external violence, 482; obstruction of, from regional enteritis, 544; role of, in renal transplantation, 557; surgical injuries to, 557

Urethra, Stricture of, 79; electric forage for cicatricial stenosis of posterior, 79; membranous urethroplasty: indications and postoperative results 15 years later, 79; diagnosis and surgical management of rectourethral fistulas, 467; role of normal female, in sphincter mechanism of bladder, 483; rupture of posterior, 558

Urinary tract, Urethrovaginal fixation to Cooper's ligament for correction of stress incontinence, cystocele, and prolapse, 63; urologic aspects of renal hypertension, 75; 10 years of organ-preserving surgery in urogenital tuberculosis, 76; membranous urethroplasty: indications and postoperative results 15 years later, 79; anterior approach to surgery of upper, 172; changing concepts in obstruction of lower, in children, 173; effect of chronic mechanical obstruction on ureteral peristalsis, 173; local hypothermia of urinary bladder during transurethral surgery, 174; surgical treatment of multiple, recurrent, branched, renal, staghorn, calculi by pyelonephroileovesical anastomosis, 273; prone position in intravenous urography for study of upper, 380; silicone flotation: more accurate method for isolation of exfoliated malignant cells of carcinoma in, 381; frequency and significance of infection of, in trichomoniasis in women, 381; chronic infection of, among patients with spinal cord injury, 381; origin, clinical experiences, and treatment of obstructions of lower ureter in childhood, 382; use of 1314 TH in tuberculosis of, 382; new procedure for correction of urinary incontinence, 384; preliminary report on modified vesicourethropexy, 384; advantages of center for treatment of tuberculosis in, 482; role of normal female urethra in sphincter mechanism of bladder, 483

Urine, Diversion of, through an isolated rectal segment, 77; management of postpartum retention of, 175; separation of neoplastic cells from, containing blood or pus cells by means of differential centrifugation, 557

Uterus, Choriocarcinoma, 59; perforations of, 67; management of dysfunctional bleeding from, 157; pelviography in cancer of, with specially prepared contrast medium, 196; congenital malformations of vagina in presence of anatomically and physiologically normal, 261; carcinoma of body of, at Chelsea Hospital for Women, 1943–1953, 264; indications for immediate hysterectomy without curettage in cases of hydatidiform mole, 264; precursors of corpus cancer—III, appearance of cancer of endometrium in estrogenically conditioned patients, 265; intrauterine isotopes in menorrhagia, 367; abnormal bleeding from, subsequent to pelvic surgery, 368; management of recurrent carcinoma of cervix following simple total hysterectomy, 368; rupture of, during pregnancy, 372; management of choriocarcinoma and related tumors of testis and, 472; congenital malformation of, 547; rupture of, 548

Uterus cervix, Endometriosis of, 59; benign tumors of, 59; studies on inheritance of cancer of human, 60; relationship of sexual activity to cancer of, 60; treatment of cancers of, at Keil University Women's Clinic from 1938 to 1954, 60; combined treatment of carcinoma of, with full irradiation therapy followed by radical pelvic operation, 61; improvement of cure rates for Schauta and Wertheim operations by more radical approach, 61; critical points of failure in therapy of cancer of, 61; cytotopographic and histotopographic investigation of canal of, in preinvasive cancer, 158; results in management of preclinical carcinoma of, 158; carcinoma of; radical hysterectomy and pelvic lymphadenectomy, 159; survival in invasive carcinoma of, 5 to 10 years after radiation therapy, 159; surgical treatment of cancer of, recurring after primary irradiation therapy, 159; pregnancy after ring biopsy, conization, and amputation of, 261; carcinoma in situ of, 262; carcinoma in situ, beginning carcinoma, and clinical carcinoma of, 262; report of symptomatic endocardial metastasis in carcinoma of, 262; further experience with radiogold as adjunct to radium therapy in treatment of pelvic lymph nodes in cancer of, 262; cytology of, in pregnancy, 266; radiosensitivity testing procedures in cancer of, 300; host factors affecting radiation response in carcinoma of, 301; carcinoma of, treated with continuous intra-arterial methotrexate and intermittent intramuscular leucovorin, 306; colpomicroscope, auflichtmikroskop, in diagnosis of benign and premalignant lesions of, 367; review of 36 Shirodkar operations, 368; management of early carcinoma, 368; recent cure results of cancer of, 368; management of recurrent carcinoma of, following simple total hysterectomy, 368; clinician's dilemma: conization for evaluation of carcinoma in situ of, in pregnancy, 372; use of stainless steel wire in treatment of incompetence of, 372; characteristic bone lesions in postirradiated carcinoma of, 405; colpomicroscopy, new method of study of, in living, 471; factors affecting prognosis of cancer of cervix in pregnancy, 471; prognosis in carcinoma of, as determined by vaginal smear, 472; rectal and bladder injuries in relation to radiation dosage in carcinoma of, 472; subsequent obstetric performance of patients meeting historical criteria for incompetence of, 475; surgical treatment of cancer of cervix, 548

VAGINA, Culdoplastic technique for prevention and correction of prolapse of vault of, and enterocele, 63; gynosteran in treatment of leukorrhea, 63; urethrovaginal fixation to Cooper's ligament for correction of stress incontinence, cystocele, and prolapse, 63; sigmoidovaginostomy; new method of obtaining satisfactory depth of, 157; congenital malformations of, in presence of anatomically and physiologically normal uterus, 261; cysts of wall of, 261; late irradiation changes in cytology of, 261; dyspareunia following operations on, 261; imperforate, in newborn, 270; nature of discharge, 370

Vagotomy, Effect of medical and surgical, on augmented histamine test in man, 462

Varices, Cirrhosis of liver and bleeding esophageal, 545; on portacaval shunt for treatment of bleeding esophageal, in bilharzial patients, 545

Vascularization, Of disrupted and resutured wound compared with that of primarily healing wound, 293

Vasopressors, Blood pressure and urinary responses to increasing concentrations of norepinephrine in sequential hemorrhage, 586

Veins, Resection of malignant thymoma with prosthetic replacement of superior vena cava, 43; angiographic observations on arteriosclerotic venopathy of inferior vena cava, 183; injuries of vena cava caused by external trauma, 183; chronic venous insufficiency of lower extremity, 183; lymphography in diseases of, of lower extremity, 397; physiology and clinical significance of venous pressure, 495; spontaneous rupture of splenic, during pregnancy, 495; thrombosis of, and pulmonary embolism, 495; replacement of vena cava defects, 496; combined teflon-autologous grafts of, for small artery replacement in dogs, 497; effect of thiopental on tone of peripheral, 504; new technique for hepatic phlebography, 582; significance of phlebography in modern treatment of varicose, 583

Vocal cords, Movements of, after thyroidectomy, 340; paralysis of, after thyroidectomy, 439

Volkmann's contracture, Of calf, 493

Vulva, Cancer of, 63; cancer of, 160; intraepithelial and infiltrative carcinoma of, 160; inguinal irradiation and lymph node excision in carcinoma of, 161; infiltrative squamous cell, epidermoid, carcinoma of, 265; carcinoma of, 473

WOUNDS, Microlymphangiographic study of healing by second intention of experimental, 93; complications of surgical, 93; treatment of snake bite by isolation perfusion technique, 188; incision and suction following injection of rattlesnake venom, 189; experiences with wire closure of lumbodorsal incisions and investigation of tissue reaction from thermal effects of diathermy, 189; prevention of dehiscence of, by use of stainless steel retention sutures, 293; vascularization of disrupted and resutured, compared with that of primarily healing, 293; civilian penetrating, of abdomen, 358; water and hexosamine content in pedicled grafts, autotransplants, and linear, 531; protection of contaminated deep, against infection by intraperitoneal neomycin solutions, 571

Wrist, Conservative treatment of old fractures of carpal scaphoid, 281; hunchback carpal bone, 281; injuries of articular disc at, 390; tendon transfers for radial palsy, 565

ABSTRACTS AUTHOR INDEX TO VOLUME 113

Abbott, William E., 200
